

Yes on HB1211

The safety of our students is extremely important. This HB1211 will allow important information to be reported to superintendents, who can then make informed decisions affecting the safety of students. We've seen awful, violent things recently that have taken the lives of some students and threatened the safety of other students. Maryland communities and parents support this bill that balances the rights of the accused with the critical importance of student safety.

Please give HB1211 a favorable report.
