Ways and Means Committee

Delegate Fair

HB0215 - OPPOSE

Elections - Ranked-Choice Voting in Contests for Presidential Nomination and Certification of Election-Supporting Technology

I send this communication in objection to this bill. I see there is no reason the change the existing system. This effort will make the process and the results difficult to total and defend. It will take away the power of the one individual = one vote. This does not reflect my view of voting which has been in existence for many generations. I respectfully request this concept be rejected in total.

Respectfully,

Tudy Adler

Clarksville, Md.
