

Please SUPPORT HB1008 " Vehicle-Miles-Traveled Tax and Associated Mandated Devices - Prohibition (Transportation Freedom Act of 2025)"

If Maryland started recording mileage driven and then implementing a tax based on mileage, this would be a violation of a citizen's right to privacy as specified in the U.S. Constitution.

If a Maryland citizen drives a large portion of their miles in another state, why should Maryland be able to tax those miles?

Citizen's already pay Maryland gas tax. Owner's of gas/diesel powered vehicles have already incurred a drastic increase in Maryland registration fees over the last year.

Electric vehicle owners, who don't pay gas tax, should have increased registration fees to fund the Maryland road maintenance budget.
