

What are Earned Wage Access (EWA) Products?

EWA products, known as **payday loan apps**, allows employees to borrow a portion of their paycheck before payday, typically through mobile apps that charge fees for instant access to funds, with some also soliciting “tips.”

SB 94 is a step in the right direction for increasing consumer rights protections from EWA lenders by banning tips. It also addresses the unintended consequences of the current law, which exempts EWA lenders from some of Maryland’s anti-discrimination laws. SB 94 will protect consumers and ensure that EWA lenders are practicing safety in Maryland.

Consumers need strong protections to prevent them from incurring hidden costs when accessing their own wages.

For these reasons, CASH encourages a favorable report on SB 94.
