

## **SB582: Consumer Protection - Unsolicited Loans**

**Position: Favorable**

February 19, 2026

The Honorable Kriselda Valderrama, Chair  
Economic Matters Committee  
230 Taylor House Office Building  
Annapolis, MD 21401  
Cc: Members of the Committee

Chair Valderrama and members of the Economic Matters Committee,

Economic Action Maryland Fund urges a favorable report on SB582, which would place guardrails around checks and other loans received, unsolicited, by consumers across Maryland. We support the amendments added in the Senate Finance Committee, which clarify the scope of the bill to include unsolicited home purchase offers and exclude checks sent to access existing accounts.

We write in support of this bill on behalf of our clients, supporters, and all Marylanders, but our position is informed by personal experience. Our staff, like so many Marylanders, have received these unsolicited checks in the mail. Even as experienced consumer advocates we have been taken off guard, confused, and unsure about the nature of these unsolicited offers. We have found the marketing deceptive at worst and misleading at best.

These checks are a trap for people who are not savvy about this practice, do not understand they are loans with interest attached, and unwittingly commit themselves to a high interest loan believing it to be a regular check. In fact, the practice is so fraught that the Attorney General of the District of Columbia issued a warning to consumers about these checks.<sup>1</sup>

Perhaps more concerning, these unsolicited checks expose individuals to identity theft and fraud. It is easy for someone to pull these offer letters out of a mailbox or out of someone's recycling. According to the FBI, mail-theft related check fraud is on the rise.<sup>2</sup> While their focus is on individuals stealing outgoing checks, it is just as easy for thieves to steal these unsolicited, incoming checks.

For these reasons, we urge a favorable report on SB582 as amended.

Sincerely, Jennifer Bevan-Dangel, Deputy Director
