House Bill HB 1024

We support passage of bill number HB 1024.

We built our home, paid our property taxes, paid the mortgage and cared for our property. Currently the MPRP overhead powerlines are set to be placed 125' from our house and run through our farm ground.

Our property was put into the Agriculture Land Preservation program. This was done so it would remain farm ground and provide a beautiful viewshed. There needs to be protection for the landowners that have a commitment to the ground they care for. Why would the desires of huge companies to make more profit negate the promise we made to the State of Maryland? Why would the State of Maryland say they are no longer committed to having a beautiful state? If the State allows the construction of powerlines across land that has been placed in the Agriculture or Land Preservation Program, then all provisions' of this contract with me should be null and void.

We ask you to Support and Pass House Bill Number HB 1024. Thank you for your effort.

Sincerely,

Kenneth and Fay Miller
