

Written Support for BILL HB1221 - Jillian & Lindsay Wiener Short Term Fire Safety Bill

Regulations require rental properties to adhere to specific safety requirements including operational smoke alarms with audibility standards, fire extinguishers, and safety postings with evacuation diagrams which are to ensure safe living conditions for their occupants. These same standards should be required for ALL rentals, including short term rentals which are extremely prevalent in the market today. The tragic death of Jillian and Lindsay Wiener could have been prevented with these requirements in place, and let's hope that with the passing of this bill, it will prevent future devastation. Please vote in support of BILL HB1221 - Jillian & Lindsay Wiener Short Term Fire Safety Bill.
