

To whom it may concern,

I have worked extensively with the voter lists, and have found there to be a notable number of deceased individuals still listed on them. While door knocking for my campaign in 2022, I distinctly remember talking to the family of a voter that was actively listed, and being informed that they had been deceased for two full years. I have no wish to bring up such unfortunate discussions with family members already suffering from loss, and to this end, I see accurate modifications of the voter rules due to death as highly desirable.

I support this bill, and administrative accuracy in general.

Thank you for putting this forward,  
Travis Lerol
