

UNFAVORABLE
Senate Bill 50
Education - Interscholastic and Intramural Junior Varsity and Varsity Teams and
Sports - Designation

Senate Committee on Education, Energy, and the Environment
February 18, 2026

Lauren Lamb
Government Relations

The Maryland State Education Association strongly opposes Senate Bill 50, which would, in practice, require certain school interscholastic and intramural athletic teams or sports to exclude some transgender students. It would also allow certain parties to bring civil action against schools, government entities, or athletic organizations based on noncompliance with provisions of this bill.

MSEA represents 75,000 educators and school employees who work in Maryland's public schools, teaching and preparing our almost 900,000 students for the careers and jobs of the future. MSEA also represents 44 local affiliates in every county across the state of Maryland, and our parent affiliate is the 3-million-member National Education Association (NEA).

This bill would restrict students' eligibility to participate on certain school athletics teams based on a narrow characterization of biological sex. This would bar many transgender, intersex, and gender nonconforming students, whose gender identity may not align with their sex, from participating on the athletic teams that align with their gender identity, and thus would effectively exclude some students from school athletics altogether. Policies that function to exclude transgender students from school sports are plainly discriminatory and harmful to students. Transgender, non-binary, and gender nonconforming students are important members of our school communities and, like all students, deserve to be embraced, included, and treated with dignity.

It is well-documented that transgender and gender nonconforming youth face increased rates of depression and suicidal ideation compared to their cisgender peers, and that they are more likely to experience harassment and social alienation

at school.¹ ² The American Academy of Pediatrics firmly opposes legislation that would prevent transgender students' participation on athletic teams that align with their gender identity, calling such bills "dangerous" and advising that "playing on sports teams helps youth develop self-esteem, correlates positively with overall mental health, and appears to have a protective effect against suicide."³ We echo their condemnation of such policies, including those proposed in this bill. School policies play an undeniable role in students' wellbeing, and it is incumbent upon county boards and education leaders to develop and uphold research-based policies that affirm the dignity of all students.⁴

Like all Maryland students, transgender and gender nonconforming students deserve respect, opportunity, and access at school, including in athletics.

We strongly urge the committee to issue an unfavorable report on Senate Bill 50.
