SB0801– FAVORABLE

I am in favor of proposed bill **SB0801** and ask that you give it a favorable report.

I have lived in Maryland for 44 of my 46 years. Never have I ever paid almost \$800 for electricity for ONE month until February 2026. This does not even compare as we also use oil heat and a wood stove to help offset our electricity consumption to heat our home.

The green policies have set up Maryland's economy to fail.

People are having to choose between heating their homes and eating.

This is just insanity. We have to change course in order for Marylanders to be able to survive.

Withdraw the State from the Regional Greenhouse Gas Initiative by January 1, 2027.

Authorize the State to rejoin the Initiative if all other states served by PJM Interconnection become full Members, or the State becomes and remains a net exporter of electricity.

Eliminate the surcharge that allows recovery of costs to utilities from the EmPOWER energy efficiency programs.

Alter the rate at which eligible customer-generators are paid for net excess generation.

For these reasons, I ask you to please issue a favorable report on **SB0801**.

Sincerely,
Crystal Kijesky
