Testimony in support of SB0584
To: Education, Energy and Environment Committee

Dear Chair Feldman and members of the Education, Energy and Environment Committee

My name is Jim Werner and I live in Frederick County. I'm writing to express my support for SB0584. A power company applying for a CPCN knows that they will be permanently disrupting the lives of those people impacted by this powerline. That includes landowners who will have the power line cross their property and landowners, adjacent to the right of way who will also be impacted. All of these landowners deserve the right to be notified of the CPCN in a timely manner and they deserve to be able to follow all the proceedings relating to the CPCN and possible destruction of their property.

I strongly support SB0584, and respectfully urge you to support and pass this bill. No Marylander should have to ask permission from a power company to use their own property for whatever lawful reason they want.

Thank you for considering this important issue.

Sincerely,

Jim Werner

RE: Testimony in Favor of Senate Bill 584 -
Certificates of Public Convenience and Necessity and Transmission Lines – Notice to
Landowners

Chair Feldman, Vice-Chair Kagan, and members of the committee,

My name is Jamie Shopland, and I am a candidate for Frederick County Council, District 2. I am testifying in strong support of Senate Bill 584 because it reinforces something rural communities in Council District 2 depend on: respect for landowners, farms, and property rights.

In Frederick County, land is more than acreage on a map. It represents generational family farms, agricultural livelihoods, and the rural heritage that sustains our local economy. When transmission infrastructure like the Maryland Piedmont Reliability Project (MPRP) is proposed, it can directly affect soil conservation, crop planning, livestock operations, and the long-term viability of family farms.

One example close to home is Gaver Farm, which sits directly in the proposed path of a transmission line. My own family has visited this farm for several years to cut our Christmas tree. For us, and for many Frederick County families, it is not just a farm. It is part of my family tradition, our local economy, and our connection to the land. Projects that affect farms like this are not abstract infrastructure decisions; they shape the future of the community itself.

Residents in our district are confronting these realities now as transmission proposals move through our region. Many farmers and rural homeowners feel they are hearing about projects only after routes are drawn and decisions feel predetermined. That erodes trust and leaves landowners scrambling to understand how their property, income, and family legacy may be affected.

SB 584 takes a practical, pro-property-rights step by ensuring certified notice is sent to impacted and adjacent landowners early in the process. This gives farmers, rural homeowners, and agricultural producers the time they need to seek guidance, participate in hearings, and protect their interests.

Just as importantly, the bill gives the notice requirement real weight. When the stakes include farmland preservation, property values, and family livelihoods, notice must be meaningful, not optional. By linking proper notification to the validity of hearings and applications, this legislation strengthens accountability and restores confidence that public input matters.

Frederick County residents support reliable energy infrastructure. But they also expect that when projects affect their land, the process before the Maryland Public Service Commission will be transparent, fair, and respectful of property owners and agricultural communities alike.

I urge the committee and the Maryland General Assembly to give Senate Bill 584 a favorable report.

Thank you for your consideration.

Jamie Shopland
Candidate, Frederick County Council District 2

RE: Senate Bill 0584

Dear Senator Jennings and Members of the Education, Energy and Environment Committee:

I am writing in support of Senate Bill 0584. I am a concerned citizen impacted by the MPRP proposed transmission line and a Board Member of Stop MPRP, Inc, a not-for-profit organization educating impacted community members. I greatly appreciate the Committee addressing this significant problem that results in citizens being completely unaware of a project with devastating impact on their property, violating their rights to due process to intervene at the Public Service Commission.

The construction company, PSEG, defined the term “adjacent landowner” in the most narrow way in their application. This limits the number of citizens who would intervene in the case at the Public Service Commission. Roger Trudeau, the PJM Manager of Corporate Real Estate, defined adjacent in his testimony of October 17, 2024. He stated letters were sent to landowners within the right of way and those adjacent, within 275 feet of the center line. This means that homes within 276 or more feet of the center line of the transmission line right of way may never be notified about this project. This is a violation of citizens opportunities to otherwise be involved in planning and zoning issues in their community and contradictory to the PSEG Siting Analysis Criteria that states under Social Criteria that they must analyze residential buildings within 200 feet of, or within 500 feet of the transmission right of way. 500 feet is referenced as the zone of potential impact, the buffer zone, that must be considered in applications. If they are required to analyze land within 500 feet of the right way and impacts within that area, why are the landowners omitted from that process?

While most of us would define adjacent landowner as a landowner with property abutting the property in the right of way, there is no Maryland COMAR definition of adjacent to a transmission line project. It allows the construction company to select the “impacted” landowners.

In February 2025, PSEG filed an Update to the ERD and Appendix to the application. This further defined impacted landowners who will be located on the required Access Roads PSEG must build for initial construction and for permanent access to the towers and lines. These roads will be used as long as the line is in use to inspect and maintain the line and clearcut vegetation and use herbicides. They provided a detailed description of the construction of these roads which add 28 miles, 81 additional acres to the project, 65 acres of which is farmland, rendering it no longer tillable in perpetuity. The most important part of this application Appendix is that some of the access roads go through properties that are neither under the right of way, or adjacent. These are landowners directly impacted by only an access road. Many of these landowners have never been notified because there is no requirement to notify landowners on access roads. However, it is the right thing to do.

As this Bill indicates, CPCN Applications must require notification of not only impacted landowners, but those who are adjacent and provide a reasonable definition of adjacent as either an adjoining property sharing a property line or within 500 feet of the right of way. The company must provide evidence of notifying directly impacted, adjacent AND those landowners whose property is used for an access road.

This Bill should apply to any CPCN Application that has yet to be approved by the Public Service Commission as of it's effective date.

Thank you for your attention to these issues and moving forward toward passage of this important bill. Without it, construction companies are taking advantage of the rights of citizens defending the most valuable asset, their legacy for children and their estate used to fund retirement, senior care and credit to grow their business. You have an opportunity in this bill to level the playing field for those you represent.

Most sincerely,

Jenny Teeter

WRITTEN TESTIMONY

Written Testimony in Support of SB 584

Energy, Education, and the Environment Committee

Certificates of Public Convenience and Necessity and Transmission Lines – Notice to Landowners

Chair and Members of the Committee:

I submit this testimony in strong support of SB 584 based on direct experience.

In July 2024, more than 400 Maryland landowners learned — in some cases with as little as 24 hours' notice — that their property was in the path of a proposed high-voltage transmission line. Families who had farmed their land for generations, homeowners who had invested their life savings, and small businesses rooted in rural communities were blindsided.

While SB 584 applies at the time a Certificate of Public Convenience and Necessity (CPCN) application is filed, and while even earlier notice would be preferable, this legislation is an essential step forward. It requires utilities and transmission developers to be proactive and direct in their communication — not reactive, not selective, and not dependent on informal channels.

In the case of the Maryland Piedmont Reliability Project, the proposed route has continued to evolve. As the line shifts, not every newly affected landowner has been consistently notified. Adjacent property owners — who may experience visual impacts, access limitations, or economic harm — are not always directly informed under current practice.

SB 584 corrects this by:

- Requiring certified mail notice at the time of filing a CPCN application;
- Expanding notice to adjacent and abutting landowners; and
- Ensuring that recipients are clearly informed of their right to intervene in PSC proceedings.

This bill does not stop infrastructure projects. It does not change approval standards. It simply establishes that when private property may be permanently affected, utilities must communicate clearly, early in the formal process, and in a verifiable manner.

Most importantly, SB 584 gives notice requirements real meaning by establishing consequences when they are not followed. Procedural protections are only effective if they are enforceable.

Maryland property owners should not have to rely on rumor, social media, or last-minute public meetings to learn that their land is under consideration for a transmission corridor. Public utilities, which are granted significant authority and, in some cases, the power of eminent domain, should be held to a high standard of transparency and proactive communication.

For these reasons, I respectfully urge a favorable report on SB 584.

Respectfully submitted,

Joanne Frederick

President

Stop MPRP, Inc.

Re: Case No. 9748 – BGE Additional Certificate of Compliance

Dear Mr. Johnston:

Pursuant to the Public Utility Law Judge’s Notice of Requirement of Certificate of Compliance issued on April 2, 2025, in the above-referenced matter, Baltimore Gas and Electric Company (“BGE”), through its undersigned counsel, certifies that notification of the July 11, 2024 Application for a Certificate of Public Convenience and Necessity (“CPCN”) for the Brandon Shores Retirement Mitigation Project (the “Project”) was mailed to each owner of land and each owner of adjacent land to the proposed overhead transmission line. A copy of the notification letter, mailed on July 17, 2024, as well as a list of approximately two thousand addresses to which the notification letter was mailed, are attached hereto.¹ Also, as indicated in the Certificate of Service attached to the July 11, 2024, CPCN Application, BGE either mailed or emailed copies of the CPCN application to numerous state, local, and federal agency representatives, as well as state and county elected officials representing constituents in Harford, Baltimore, and Anne Arundel Counties, in compliance with COMR 20.79.02.02 and Public Utilities Article §7-207(c)(1)(vi) and (vii).

Additionally, BGE conducted several open houses about the Brandon Shores Retirement Mitigation Project in the affected counties, both before and after submittal of the formal CPCN application. Specifically, after the CPCN application was filed, BGE held open houses on the Project in Harford County on September 17, 2024, at North Harford High School and on September 5, 2024, at Fallston High School; in Baltimore County on September 10, 2024, at Perry Hall High School and on September 26, 2024, at Dundalk

¹ BGE began notifying landowners and interested persons about the Project starting in December of 2023. BGE also certified, in an August 15, 2024, Compliance Filing in this matter (Mail Log No. 311685) that it had provided the required notification to landowners about the CPCN application. In reviewing for purposes of this filing the list of approximately two thousand addresses to which the landowner notification letter was mailed on July 17, 2024, BGE identified one address that was inadvertently missing. A notification letter was mailed to that one additional address on April 8, 2025, and the address was added to the attached list.

Andrew S. Johnston, Executive Secretary
April 9, 2025
Page 2 of 2

Middle School; and in Anne Arundel County on October 1, 2024, at Orchard Beach Fire Hall.

Further, BGE has a website that contains information about the Project including notices of all open houses as well as the upcoming PSC evening public comment hearings at <https://www.goodenergyinprogress.com/project/brandon-shores-retirement-mitigation/>

Pursuant to the Commission's July 12, 2021, Operational Notice, paper copies of this filing will not be provided.

Respectfully submitted,

Parties on CN9748 Service List

Dear Valued BGE Customer:

As you may recall from a previous letter sent to you, PJM Interconnection, the organization responsible for ensuring electric reliability throughout the mid-Atlantic region, recently directed BGE to perform electric transmission system upgrades in parts of its service territory. These upgrades are necessary due to the announced retirement of Talen Energy's Brandon Shores Generating Station, a significant coal-fired electric power plant located in northern Anne Arundel County.

As part of BGE's ongoing efforts to keep you informed about the Brandon Shores Project the project team has created a website: goodenergyinprogress.com. If you have not been able to attend our community meetings or would like more information on the project, you are invited to visit the website to learn more about this important investment in our region's infrastructure. This website will be updated as information becomes available, and we encourage you to review the information and ask any questions. In addition, BGE has filed an application for a Certificate of Public Convenience and Necessity (CPCN) for the project with the Maryland Public Service Commission (PSC). The PSC has designated the CPCN application as Case Number 9748. BGE's CPCN application materials include extensive information about the need for this important project, the planned route for the project, and environmental and socioeconomic impacts associated with the project. This information is accessible on the Maryland Public Service Commission's website, <https://www.psc.state.md.us/>, by searching for Case No. 9748 under the Case/Maillog Portal on the PSC homepage, or by clicking: <https://webpsc.psc.state.md.us/DMS/recentcases>.

While design work is underway you may see additional foot traffic on the right of way. As part of the design criteria for future construction, BGE will perform survey work in the coming weeks in and along the existing BGE right of way. The intention is to document the existing conditions so we may accurately reflect the property boundaries. Should our team need to access your property, you will receive a door hanger with information regarding the access we require, what activities will be done, and confirmation for permission to access your property. ***We will notify property owners of our intent to access private property and request permission before any activities on their property.***

During the month of September, BGE will host a series of **In-Person Open House Meetings** in Harford, Baltimore, and Anne Arundel counties where you can learn more about this project, ask questions, view project plans, talk with the project team, and more.

If you are interested in learning more about the project, please sign up to become a part of our mailing list by scanning the QR code or visit the link: <https://shorturl.at/VgTl0>

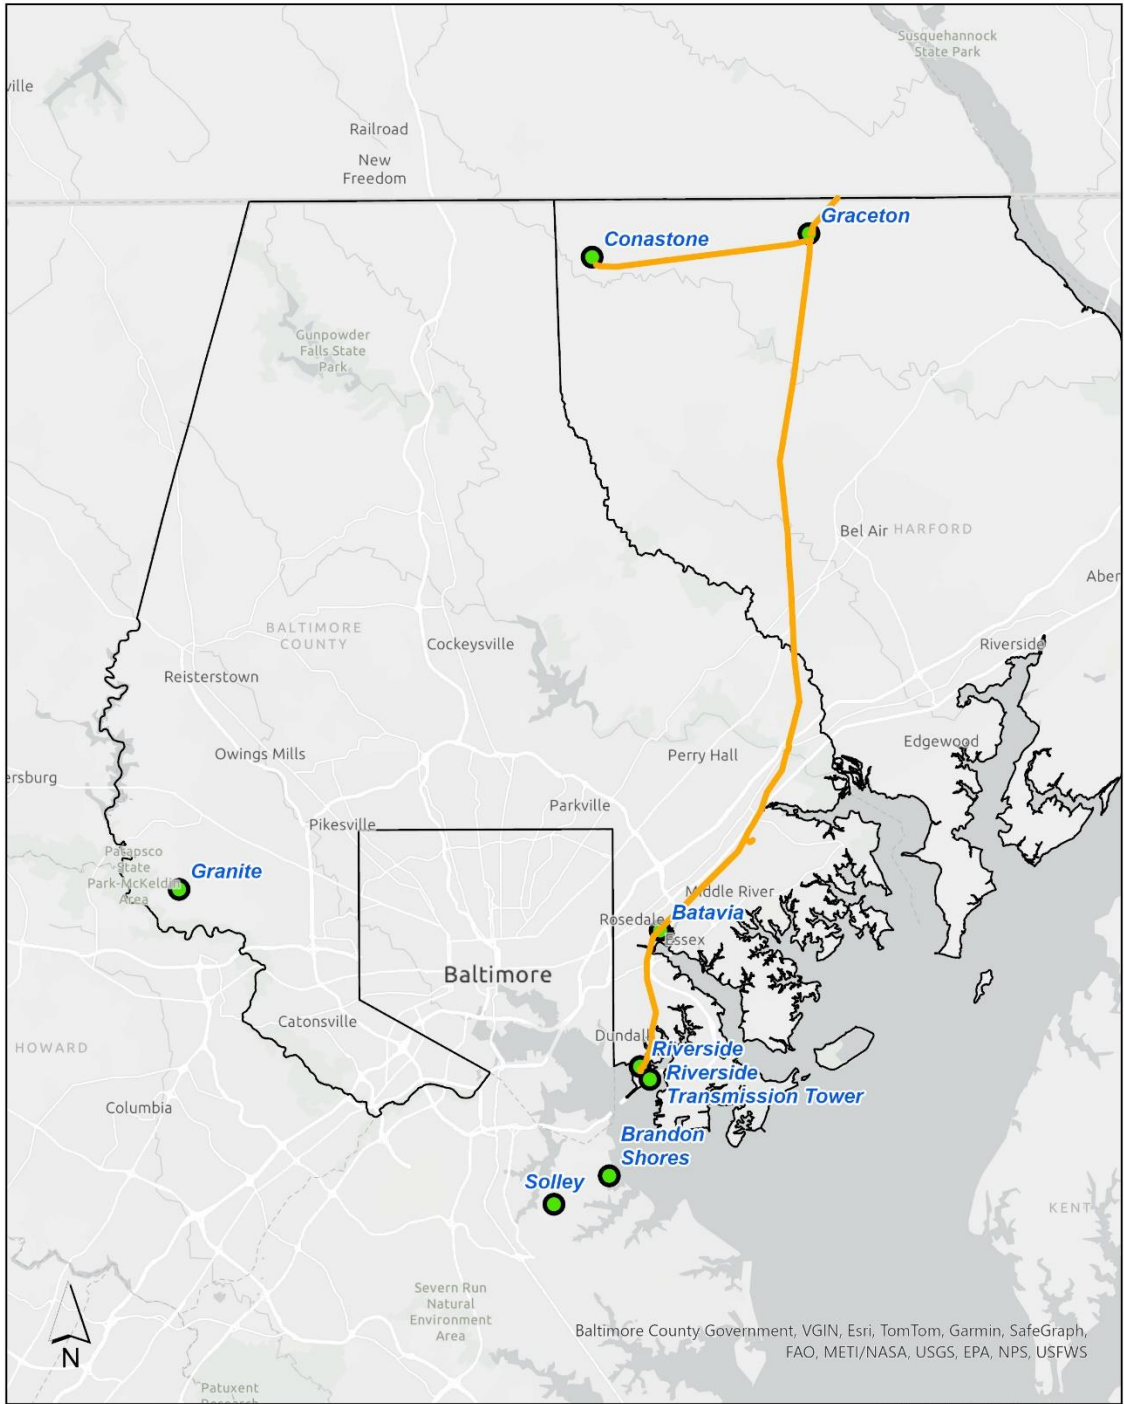

If you have any questions about the project, please contact us at 443-423-1116 during normal business hours or you can contact us anytime through our website: goodenergyinprogress.com.

Sincerely,

Tiffany Matthews-Lay

BGE Manager of Project Execution, EPC Projects, Project & Contract Management

William Zink Testimony - Favorable SB 584.pdf

Uploaded by: Lynne Zink

Position: FAV

RE: SB 584 – Favorable

Dear Members of the Committee,

I am writing in support of SB 584 due to serious concerns about transparency, inadequate notification, and confusion surrounding the process for protecting my family's property rights and safety.

In 1978, my 79-year-old widowed grandmother was pressured into signing a document relating to the right of way with BGE across her farm. This land was her legacy, and she could never have contemplated what it would eventually become. Today, massive monopoles carrying 12 visible transmission wires stretch across our family farm. While utility descriptions may minimize the scope of these installations, the physical and visual impact on our property is substantial and undeniable.

The expansion and modification of infrastructure on our land has occurred with little clarity about our rights, limited meaningful notice, and no clear explanation of how landowners can raise concerns or challenge decisions. The burden should not fall on families to decipher complex regulatory processes in order to protect their own property.

Beyond the visual and agricultural impacts, we have concerns about safety, electromagnetic field (EMF) exposure, and wildfire risk. Our EMF concerns hit close to home because my own brother had childhood leukemia which is linked in studies from the WHO, NIH, EPA, and National Cancer Institute to exposure to high voltage power lines. Landowners deserve transparency, timely written notice, and a clearly defined process to be heard before additional infrastructure is installed or expanded.

Just as my grandmother felt she had no choice decades ago, our family now feels similarly strong-armed, without clear communication or meaningful opportunity to engage. SB 584 is necessary to ensure that affected landowners receive proper notice, understand their rights, and have a fair opportunity to participate in decisions that permanently alter their property.

Our family received no written notice of their rights to intervene in the CPCN process for the Brandon Shores Retirement Mitigation Project. Only through community grassroots efforts were we able to understand the process months after the deadline had passed.

I respectfully urge a favorable report on SB 584.

Sincerely,
William Zink
Kingsville, MD

Senate EEE Committee testimony.pdf

Uploaded by: Mark Kukucka

Position: FAV

Maryland Senate Education, Energy & Environment Committee

Dear Members of the Committee:

My name is **Dr. Mark Kukucka**, and I'm here in strong support of Senator Jennings' bill to strengthen intervenor rights and landowner protections for the CPCN process.

My experience in Case No. 9748 shows exactly why this legislation is necessary.

In July 2024, landowners were given a **single 30-day window** to intervene in a billion-dollar transmission project. That notice was buried in two newspaper ads. Most landowners never saw it. Even fewer understood what it meant.

By the time we realized what was happening, the window had already closed.

I live **within 400 feet** of the BGE transmission corridor — well within the zone that Maryland courts have long recognized as “aggrieved” for standing purposes. In *Sugarloaf Citizens v. Maryland Waste Disposal*, the Court of Appeals held that residents within roughly 1,000 feet of a major project have a legally protectable interest and the right to participate.

Yet despite this precedent, despite my proximity, and despite filing detailed concerns, **I was denied intervenor status — twice.**

BGE fought aggressively to keep me out. They filed immediate oppositions to both of my petitions. They argued I had “no standing.” They argued that other parties “already represented my interests.” I still don’t know who those other parties were but the Maryland PSC accepted BGE’s arguments wholesale.

Why would a utility work so hard to exclude a nearby resident?

Because intervention brings scrutiny. Because it brings cross-examination. Because it brings accountability. And because it brings the one thing utilities do not want: **independent eyes on their wild claims.**

The current system rewards utilities for keeping the public out.

Senator Jennings’ bill fixes this. It requires **real notice**, sent directly to landowners. It requires that landowners be told — in plain English — that they have a right to intervene.

This bill restores fairness, transparency, and due process. It ensures that Marylanders have a meaningful voice in decisions that affect their homes, their health, and their future.

Thank you!

Chairman and Members of the Committee,

My name is Dr. Mark Kukucka, and I'm here in strong support of Senator Jennings' bill to strengthen intervenor rights and landowner protections in the CPCN process.

My experience in **Case No. 9748 — the Brandon Shores Retirement Mitigation transmission project** — shows exactly why this legislation is urgently needed.

In July 2024, landowners were given a single 30-day window to intervene in a billion-dollar project. That notice was buried in two newspaper ads. Most landowners never saw it. Even fewer understood what it meant.

I live within 400 feet of the corridor — well within the distance Maryland courts have long recognized as “aggrieved.” Yet despite that, and despite filing detailed concerns, I was denied intervenor status twice. BGE fought aggressively to keep me out, and the PSC accepted those arguments.

And in Case No. 9748, the PSC went even further. The Commission created a category called “Limited Intervenor” — a category not found anywhere in statute. Landowners were allowed to testify, submit evidence, and brief

deed-level property-rights issues. Then, one month later, the PSC issued a ruling declaring those very issues “outside the scope” of the case — effectively erasing their voices after the fact.

In other words, the PSC allowed landowners to speak, and then retroactively cancelled the substance of what they said. **That is not meaningful participation. That is procedural theater.**

Senator Jennings’ bill fixes the *front end* of the process — real notice, real opportunity to intervene. But Maryland also needs to ensure that once landowners are in the room, their issues cannot simply be ruled irrelevant after the fact.

This bill is a critical first step toward restoring fairness, transparency, and due process for Maryland families whose homes, health, and property rights are affected by these projects.

Thank you!

Position: FAV

Mary Ann Lisanti
Havre de Grace, Maryland 21078
maryannlisanti@gmail.com

Testimony: SB 584: Favorable

Chair Feldman and Members of the Committee,

For the record, I am Mary Ann Lisanti, a resident of Harford County, in support of SB 584.

From my experience in local and state government, major transmission projects require a careful balance between protecting the reliability and affordability of the electric grid and ensuring that communities are meaningfully engaged in decisions that affect their homes and property.

During my time in the House, I worked closely with communities, utilities, the Public Service Commission, and many of you on the Transource project in northern Harford County.

In that CPCN process, landowners raised significant impacts, including routing and agricultural preservation concerns that were simply not required to be examined under the statutory criteria at that time.

That experience exposed gaps in the law.

In response, I sponsored HB 1126, and this body passed it unanimously in both chambers. That legislation strengthened the criteria the PSC must consider before approving new overhead transmission lines, including alternative routes, environmental impacts, and the use of existing easements.

That was an important step in strengthening the integrity of the process.

Today, we are entering another era of major transmission expansion in Maryland. Projects related to the Brandon Shores retirement and other regional reliability upgrades will affect communities across multiple counties, from Harford to Baltimore, and from Anne Arundel to Western Maryland and the Eastern Shore as lines pass through and within our State.

Last year, when I began working with former constituents in Harford County on Brandon Shores-related transmission upgrades, it became clear that procedural gaps remain. Public meetings on that project occurred after the deadline to intervene had already passed, leaving landowners without a viable means to participate in the process.

While current law requires notice, it does not clearly ensure that landowners are formally advised of their right to intervene, how to do so, and the applicable deadlines. Too often, the notice resembles a general informational or marketing document rather than a clear legal notice of rights.

Therefore, when clarity is lacking, meaningful participation suffers.

SB 584 addresses that procedural gap.

It does not undermine reliability. It strengthens public confidence in the process we have created.

Just as we strengthened substantive review in 2018, we have the opportunity today to strengthen procedural fairness by ensuring people understand how to participate in a complex regulatory process that affects the very place they live and raise their children.

I respectfully urge a favorable report.

Thank you.

P.O. Box 1475, Baltimore, Maryland 21203

PJM developed a plan that maintains reliability through electric new generation sources. In the BGE service area, this work includes construction of one new substation in both Baltimore County and Anne Arundel County and modifying approximately 35 miles of transmission lines on existing BGE rights-of-way between the Pennsylvania border and southern Baltimore County.

Dear valued BGE customer,

PJM Interconnection, the organization responsible for ensuring electric reliability throughout the mid-Atlantic region, recently directed BGE to perform electric transmission system upgrades. These upgrades are necessary due to the announced retirement of Talen Energy's Brandon Shores Generating Station, a significant coal-fired electric power plant located in Northern Anne Arundel County.

To replace the lost electricity generation, PJM developed a plan that maintains reliability through electric transmission infrastructure work rather than new generation sources. In the BGE service area, this work will include upgrading several existing BGE substations, construction of one new substation in both Baltimore County and Anne Arundel County and modifying approximately 35 miles of transmission lines on existing BGE rights-of-way between the Pennsylvania border and southern Baltimore County.

We wanted to ensure prompt notice of upcoming activity near your property on BGE's rights-of-way beginning in December 2023 supporting this work, as you or a property you own is located within 300 feet of the existing rights-of-way within Baltimore County.

To begin designing the upgraded infrastructure, we may be required to perform property surveys, wetland delineation, and soil borings and sampling within the BGE right of way. If this requires accessing private property, we prioritize respecting your property rights and privacy and we will provide advance notice.

PJM's regulator, the Federal Energy Regulatory Commission, just approved this work on November 8, and our commitment is to provide transparent and on-going dialogue and open lines of communication with the community.

We believe that community input and collaboration are essential for the success of the project. We will continue to provide updates, answer any questions you may have, and work together with the community to ensure that the project is carried out in a manner that respects the needs and concerns of all stakeholders. As we are currently in the preliminary stages of the design process, we plan to engage with the communities located near the project areas beginning in early 2024.

If you have any questions, please call the outreach team at 443.423.1116, or email BGE-Brandon-Shores@assedollc.com

We value your input and insights, and we are committed to keeping you informed throughout this important safety and reliability project's life cycle.

Sincerely,

Tiffany Matthews-Lay

Brandon Shores Good Energy Mitigation Project Fact Sheet

PROJECT OVERVIEW:

PJM Interconnection, the organization responsible for ensuring electric reliability throughout the mid-Atlantic region, recently directed Baltimore Gas and Electric (BGE) to perform electric transmission system upgrades. These upgrades are necessary due to the announced retirement of Talen Energy's Brandon Shores Generating Station, a significant coal-fired electric power plant located in Northern Anne Arundel County. This development necessitates BGE's proactive efforts to upgrade, modernize, and expand its systems to support the electric grid in Maryland to continue the company's commitment to ensuring the safe and reliable delivery of gas and electricity for its customers.

BACKGROUND:

PJM, as a regional transmission organization, coordinates electricity movement in 13 states, including Maryland. This collaborative effort aims to maintain the integrity of the electric grid and ensure a seamless transition following the closure of the Brandon Shores Generating Station.

PJM has laid out a plan to support the electric grid that involves BGE's need to upgrade, modernize, and expand systems to ensure safe and reliable electricity in Maryland. This initiative will include modifications to several existing BGE Substations, construction of a new substation in Baltimore County and Anne Arundel County, as well as the modification of approximately 35 miles of transmission lines on existing BGE Right of Ways from the Pennsylvania Line to the Riverside area near the Key Bridge in Baltimore County.

WHY IT IS IMPORTANT:

The cessation of operations at the Brandon Shores Generating Station underscores the need for BGE to enhance its infrastructure to ensure the safe and reliable delivery of electricity in Maryland. This initiative includes modifications to existing substations, the construction of a new substation, and the modification of transmission lines to address the changing energy landscape.

PROJECT PHASES AND ACTIVITIES:

Undertaking projects of this magnitude involves a comprehensive approach, including planning, construction, and design. The initial phase, starting in December 2023, focuses on studying and designing the transmission lines and substations. During this period, activities such as property surveys, wetland delineation, and soil borings will be conducted along the project corridor. In addition, public hearings, environmental impact statements, and other regulatory procedures, and community engagement activities will be conducted.

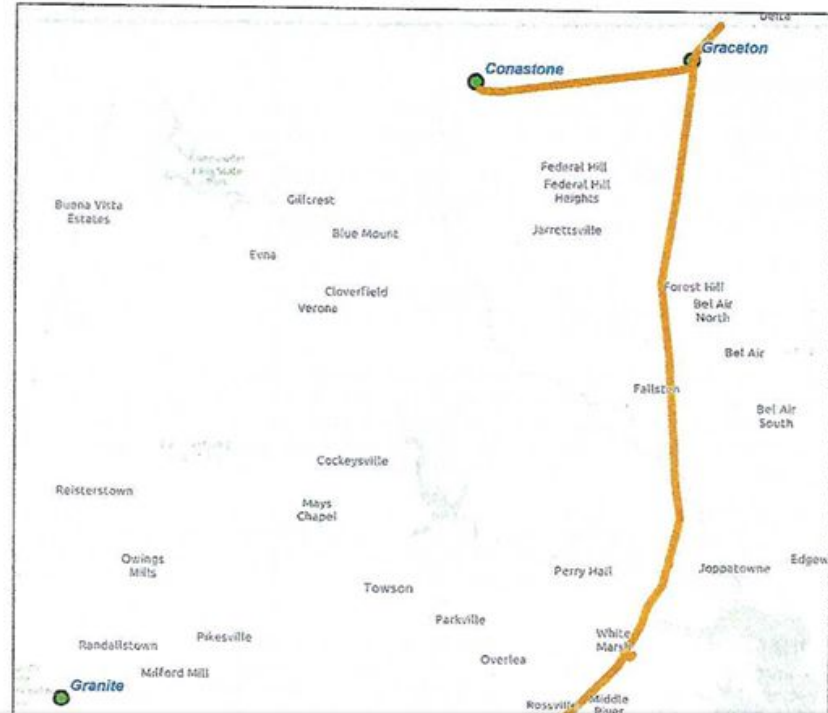

COMMUNITY ENGAGEMENT:

BGE is committed to providing transparency and input to ensure the needs of our stakeholders are met. Regular community meetings will be held to allow you to ask questions and provide feedback to the project team, and we will continue to engage with you throughout the project.

Contact the project team at brs@bge.com or call 1-800-432-2222.

The project team will get back to you as soon as possible.

PJM has laid out a plan to support the electric grid that involves BGE's need to upgrade, modernize, and expand systems to ensure safe and reliable electricity in Maryland. BGE Customer Or Current Resident 11611 Franklinville Rd Upper Falls, MD 21156-1907

Dear Neighbor,

We are writing to invite you to an opportunity to learn more about an important project coming to your area. You may have heard that BGE is embarking on a large transmission upgrade project called BGE Brandon Shores Mitigation. The project is necessary due to the announced retirement of Talen Energy's Brandon Shores Generating Station, a significant coal-fired electric power plant located in Northern Anne Arundel County.

As part this project BGE is upgrading several existing BGE substations, constructing one new substation in both Baltimore County and Anne Arundel County and modifying approximately thirtyfive miles of transmission lines on existing BGE rights-of-way between the Pennsylvania border and southern Baltimore County.

BGE invites you to join us at the Brandon Shores Reliability Mitigation Program Virtual Open House where you can learn more about this program, ask questions, view project plans, talk with the project team, and more.

BGE Brandon Shores Community Meeting Perry Hall Library 9685 Honeygo Boulevard, Perry Hall, MD 21228 April 8, 2024, 6 p.m. - 8 p.m. Or you can join us virtually. April 11, 2024, 6 p.m. - 8 p.m.

You can register here - https://shorturl.at/uV259 or by clicking the QR Code.

If you have any questions about the project, please contact us at 443.423.1116. You may also email BGE-Brandon-Shores@assedollc.com and a member of the project team will be happy to help you.

I thank you in advance for your patience and understanding as we complete this important safety and reliability project.

Sincerely, Tiffany Matthews-Lay Principal Project Manager, BGE Large Projects Projects & Contracts

Dear Valued BGE Customer:

As you may recall from a previous letter sent to you, PJM Interconnection, the organization responsible for ensuring electric reliability throughout the mid-Atlantic region, recently directed BGE to perform electric transmission system upgrades in parts of its service territory. These upgrades are necessary due to the announced retirement of Talen Energy's Brandon Shores Generating Station, a significant coal-fired electric power plant located in northern Anne Arundel County.

As part of BGE's ongoing efforts to keep you informed about the Brandon Shores Project the project team has created a website: goodenergyinprogress.com. If you have not been able to attend our community meetings or would like more information on the project, you are invited to visit the website to learn more about this important investment in our region's infrastructure. This website will be updated as information becomes available, and we encourage you to review the information and ask any questions. In addition, BGE has filed an application for a Certificate of Public Convenience and Necessity (CPCN) for the project with the Maryland Public Service Commission (PSC). The PSC has designated the CPCN application as Case Number 9748. BGE's CPCN application materials include extensive information about the need for this important project, the planned route for the project, and environmental and socioeconomic impacts associated with the project. This information is accessible on the Maryland Public Service Commission's website, <https://www.psc.state.md.us/>, by searching for Case No. 9748 under the Case/Maillog Portal on the PSC homepage, or by clicking: <https://webpsc.psc.state.md.us/DMS/recentcases>.

While design work is underway you may see additional foot traffic on the right-of-way. As part of the design criteria for future construction, BGE will perform survey work in the coming weeks in and along the existing BGE right-of-way. The intention is to document the existing conditions so we may accurately reflect the property boundaries. Should our team need to access your property, you will receive a door hanger with information regarding the access we require, what activities will be done, and confirmation for permission to access your property. **We will notify property owners of our intent to access private property and request permission before any activities on their property.**

During the month of September, BGE will host a series of **In-Person Open House Meetings** in Harford, Baltimore, and Anne Arundel counties where you can learn more about this project, ask questions, view project plans, talk with the project team, and more.

If you are interested in learning more about the project, please sign up to become a part of our mailing list by scanning the QR code or visit the link: <https://shorturl.at/VgT10>

If you have any questions about the project, please contact us at 443.423.1116 during normal business hours or you can contact us anytime through our website: goodenergyinprogress.com

Sincerely,

Tiffany Matthews-Lay
BGE Manager of Project Execution, EPC Projects, Project & Contract Management

COMMENTARY

Life lessons from Gene Oishi and hope for a 'do better' America

Dan Rodricks

Among the last things Gene Oishi wrote, the preface to the new edition of his 1988 memoir "Hiroshi: The resurgence of racial prejudice and xenophobia in the United States." But then it went away from that troubling subject and returned to Donald Trump. "My memoirs Oishi wrote in March, "is not about the state of our country, but about how I view the place in it."

The memoir, "In Search of Hiroshi," tells the story of a man's daunting life-long struggle to find himself and peace in his Japanese and American identities.

As a boy in California at the outbreak of World War II, he and his family were among thousands of Japanese-Americans cruelly imprisoned in a barbed-wire concentration camp by their own government. They spent three years there. His parents lost everything they had worked for, over four decades, on Barbedale in the Santa Anita Valley.

An adult in 1946, a reporter for The Baltimore

Gene Oishi, who died recently, was imprisoned as a boy with his Japanese American family during World War II. His memoir about that experience, first published in 1988, has been reissued by Kaya Press. **MIYVA NATEL**

and with Japanese parents, or with Japanese friends?"

"While he wrestled with all of this over decades, Oishi managed to enjoy a full, productive life and the respect of his peers. The man I knew in my first few years at the bygone Evening Sun, had an outwardly optimistic spirit, and he enjoyed a good laugh."

Barry Rascover, for many years a poet, reporter, editorial writer and editor for The Sun, knew Oishi as a superb journalist and even better human being.

"Somehow, he set aside a hurtful and traumatizing childhood in an internment camp for Japanese-Americans during World War II and became an American success story," Rascover said Monday.

Following the Agnew scandal, Rascover said, Oishi "continued the great journalistic tradition of down-the-middle reporting of events and speeches," including those with Agnew.

When Oishi left the Sun, he took a job in Annapolis as press secretary to Gov. Harry Hughes. He filled that role capably, Rascover said, though Oishi was still a journalist at heart.

"He was ill suited to present a one-sided message as press secretary to do," Rascover said. "Gene was too much a believer in presenting the full story

rather than shuffling the facts to make his boss look good."

"That is clear from his memoir. Oishi is unparing in his self-examination, his look back at the course of his life after World War II. "I grieved for years that I was not seriously affected by my wartime experience. I told myself that such things happen in war, and it took me years to get past the protective cloak I had wrapped around myself."

But that fear, and the result is what he left us — a powerful record of the pain felt by victims of bigotry and cruelty, and the effort required to live a good life in spite of it.

"Gene led a remarkable life," Rascover wrote, "turning bad episodes into life lessons for building a better tomorrow."

Madeline Miyoko, a friend of Oishi and a writer of Japanese descent, "a certain sort of hope" in the face of adversity.

And maybe it's the hope that all of us, sooner than later, can do better.

The Baltimore Police Department investigates a fatal shooting by officers Monday night in the Southwest District. **KEERTENHACKER/STAFF**

Investigators say young male fatally shot by Baltimore police

By Kiersten Hacker and Dan Bellan

Baltimore Police fatally shot a young male Monday night after authorities say he drew a handgun while fleeing from officers.

The department is investigating the fatal encounter in Central Southwest Baltimore along with the Maryland Attorney General's office, which said Tuesday afternoon that the person killed was a "juvenile."

Neither agency specified how old he was. Officials said he was "the same person" as the body camera footage would be released. "In accordance with the applicable policies," authorities said, the shooting happened after an encounter at about 9:45 p.m. on the east block of North Clifton Street in Central Southwest Baltimore's Franklin Square neighborhood.

There, officers tried to stop the young person. At a news conference later Monday night, Baltimore Police Commissioner Robert Worsley said the young person had exhibited "characteristics of an armed person," a phrase often used by the department to describe certain mannerisms that prompt officers to investigate further.

"There's any number of things that they could have seen that would have alerted them that the individual was armed," Worsley said.

The minor ran from police, officials said. A preliminary review of body camera footage showed that while in the east block

Brandon Shores Retirement Mitigation Project Update December 2024

You may have recently noticed BGE contractor crews in your community conducting preconstruction surveying along BGE's transmission right-of-way. This survey work includes adding temporary wooden stakes in the ground as part of the design criteria for future construction. Surveying and staking is an essential part of the process to document existing conditions and accurately identify property boundaries.

Here's What to Expect

On December 16 and 17, a team of contractors will walk the BGE right-of-way. All survey stakes will be removed by December 20, weather permitting.

Questions

If you have any questions or concerns, please contact our project team at 443-423-1116. We also invite you to visit our website at www.goodenergyinprogress.com to learn more about this important investment that will ensure continued reliability of the regional electric grid.

Dear Neighbor,

As you may recall from a previous letter sent to you, PJM Interconnection, the responsible for ensuring electric reliability throughout the mid-Atlantic region, recently directed BGE to perform electric transmission system upgrades in parts of its service territory. These upgrades are necessary due to the announced closure of Tale Brandon Shores Generating Station, a significant coal-fired electric power plant in northern Anne Arundel County.

As part of the permitting process, Baltimore Gas and Electric Company (BGE) submitted an application to the Maryland Department of the Environment's Wetlands and Waterways Program for a permit to construct a 29-mile new 230kV transmission line within BGE's existing 150-foot-wide right-of-way (ROW) from the existing Graceton Substation (Whiteford, Harford County, Maryland) to the new Batavia Substation (Rosedale, Baltimore County, Maryland). The Project will additionally involve the construction of a new substation on an approximately 10-acre site south of Batavia Farm Road in Rosedale, Baltimore County, Maryland.

Since you are a contiguous property owner or an appropriate local official, you have been notified of the permit application to MDE for proposed project. If you wish to comment on plans for this project or if you have any questions or concerns, you may contact our Community Outreach consultant, on behalf of BGE at 443.423.1116 or BGE-Brandon-Shores@assedollc.com.

Sincerely,

Patricia G. von Paris

Re: SB 584: Favorable

Chair Feldman and Members of the Committee

My name is Patti von Paris, my husband John and I are here in support of Senate Bill 584.

We are lifelong residents of Upper Falls, Maryland. BGE's high voltage power lines run next to our home.

We learned about the BGE-Brandon Shores Project in February 2024 when we received a letter addressed to "BGE Customer or Current Resident" stating plans to retire the power plant, upgrade substations, build a new substation, and modify 35 miles of transmission lines.

In late March 2024, a second letter arrived repeating the same information including the modification of 35 miles transmission lines. BGE also invited us to a community meeting on April 8, 2024 which they abruptly canceled.

In July 2024, we received another letter informing us that BGE filed a CPCN (Case #9748), but the letter did not include information about our rights to intervene or how to register to intervene, or the deadline to intervene.

The last letter received in March 2025 and arriving seven months past the deadline to intervene, BGE informed us of a permit application for construction of a new 29-mile, 230 kV transmission line.

They are adding 29 miles of transmission lines rather than modifying the existing 35 miles of transmission lines.

The prior letters indicate modification of transmission lines when in fact, all along they intended to do a major construction project by adding yet another transmission line.

BGE intentionally misled the public by withholding critical project details until after the intervention deadline, leaving landowners uninformed and without a voice.

We were never informed of our rights to intervene via direct mail. An advertisement placed in a newspaper is simply erroneous.

This system is broken and needs to be fixed.

I urge a favorable report for SB584.

Testimony in support of SB0584 - Transmission Line

Uploaded by: Richard KAP Kaplowitz

Position: FAV

SB0584_RichardKaplowitz_FAV

02/26/2026

Richard Keith Kaplowitz

Frederick, MD 21703

TESTIMONY ON SB#0584- POSITION: FAVORABLE

Certificates of Public Convenience and Necessity and Transmission Lines - Notice to Landowners

TO: Chair Feldman, Vice Chair Kagan, and members of the Education, Energy and the Environment Committee

FROM: Richard Keith Kaplowitz

My name is Richard Keith Kaplowitz. I am a resident of District 3, Frederick County. I am submitting this testimony in support of SB#0584, **Certificates of Public Convenience and Necessity and Transmission Lines - Notice to Landowners**

This bill will stop power companies from harming property owners through construction of power lines on their property. It will make failure to properly notify those property owners to have specific remedies to prevent that construction from occurring.

At the same time a person applies for a certificate of public convenience and necessity for the construction of any transmission line ..., the person shall provide, by certified mail, notice of intent to run a line or similar transmission device over, on, or under the land to:

- Each owner of land that abuts the property where the construction is planned
- And, for construction of an overhead transmission line, each owner of land and each owner of adjacent land.
- Notice provided ... shall advise the recipient of any applicable right to file as an intervenor in the proceeding ...

Failure to provide notice under this section:

- Invalidates a public hearing and requires that another hearing take place

Or, if the required notice is regarding an application for a certificate of public convenience and necessity, voids the application for a certificate of public convenience and necessity.

A person whose application for a certificate of public convenience and necessity is voided ... may reapply.

This bill will require a person applying for a certificate of public convenience and necessity for the construction of any transmission line to provide certain notices to certain landowners regarding the construction; and establishing that failure to provide a certain notice invalidates a certain hearing and, under certain circumstances, voids an application for a certificate of public convenience and necessity.

I respectfully urge this committee to return a favorable report on SB#0584.

February 24, 2026

The Honorable Brian J. Feldman
Chair, Senate Education, Energy, and the Environment Committee
2 West Miller Senate Office Building
Annapolis, Maryland 21401

Re: Letter of Support – Senate Bill 584 – Certificates of Public Convenience and Necessity and Transmission Lines – Notice to Landowners

Dear Chairman Feldman and Committee Members,

On behalf of the citizens of Harford County, I write to express support for Senate Bill 584.

Electric transmission line projects can have significant impacts on private property owners and local communities. While the development of critical energy infrastructure may at times be necessary, transparency and meaningful notice to affected landowners must be fundamental components of the process.

Senate Bill 584 strengthens procedural fairness by requiring applicants for a Certificate of Public Convenience and Necessity (CPCN) to provide specific notice to impacted landowners before hearings proceed. This ensures that residents whose property rights, land use, or quality of life may be affected have adequate opportunity to be informed and to participate in the review process.

Too often, landowners learn about large infrastructure projects only after key decisions have been made. By establishing clear statutory notice requirements and consequences for failing to comply, SB 584 reinforces the principle that property owners deserve timely and direct communication regarding projects that may impact their homes, farms, or businesses.

Harford County strongly supports responsible infrastructure development, but such development must occur with transparency, accountability, and respect for private property rights. This legislation does not prevent necessary projects from moving forward; it simply ensures that affected citizens are properly notified and afforded due process.

For these reasons, I respectfully urge a favorable report on Senate Bill 584.

Thank you.

Yours truly,

Robert G. Cassilly

SB 584_HB 1210_ Certificates of Public Convenienc

Uploaded by: Trudy Tibbals

Position: FAV

SB 584/HB 1210: Certificates of Public Convenience and Necessity and Transmission Lines - Notice to Landowners: Please vote to **SUPPORT** this bill.

Dear Education, Energy & the Environment Committee and Environment & Transportation Committee:

I am writing to strongly urge you to **SUPPORT SB 584/HB 1210**, *Certificates of Public Convenience and Necessity and Transmission Lines - Notice to Landowners*.

These bills would require applicants for a Certificate of Public Convenience and Necessity (CPCN) for new or expanded transmission lines to provide direct, specific notice to affected landowners. This includes clear details about the proposed project, potential property impacts, eminent domain implications, timelines, and ways to participate in the review process—ensuring notifications go beyond generic public postings to personal outreach.

In Maryland, transmission line projects can significantly affect private property, farmland, rural communities, and individual landowners, often involving rights-of-way, visual impacts, or condemnation proceedings. Current notice requirements are often too broad or indirect, leaving property owners uninformed until late stages when options are limited. These reforms promote fairness, transparency, and due process by empowering landowners with early, actionable information to voice concerns, attend hearings, or seek alternatives—without halting necessary infrastructure but ensuring balanced input.

This commonsense measure respects property rights, supports rural and agricultural interests, and builds trust in the PSC approval process amid growing energy demands and transmission proposals.

For these reasons, I respectfully ask you to vote **in favor of SB 584/HB 1210** and help strengthen landowner notifications for transmission line projects.

Thank you for your time and thoughtful consideration of this important property rights and energy legislation.

Sincerely,

Trudy Tibbals

MDFB - Support - SB584 - CPCN and Transmission Lin

Maryland Farm Bureau

3358 Davidsonville Road | Davidsonville, MD 21035
410-922-3426 | www.mdfarmbureau.com

February 26, 2026

To: Senate Education, Energy and the Environment Committee

From: Maryland Farm Bureau, Inc.

RE: **Support of SB584 – Certificates of Public Convenience and Necessity and Transmission Lines – Notice to Landowners**

On behalf of the over 7,000 member families of the Maryland Farm Bureau, I submit written testimony in favor of SB584 – Certificates of Public Convenience and Necessity and Transmission Lines – Notice to Landowners. SB 584 provides critical protections for Maryland landowners by requiring applicants for a Certificate of Public Convenience and Necessity (CPCN) to provide certified-mail notice to each affected and adjacent landowner at the time of application, ensure those individuals are informed of their right to intervene in the Public Service Commission process, and establish that failure to give this notice invalidates a hearing or voids a CPCN application. These provisions create basic fairness and transparency for property owners who may be affected by utility-scale transmission line construction.

This bill aligns closely with the Maryland Farm Bureau's longstanding policy positions emphasizing the protection of private property rights, opposition to unnecessary fragmentation of farmland, and the requirement that utility companies respect landowners through proper notice and due process. Throughout the 2026 Policy Book, MDFB strongly affirms that landowners should not have their property rights diminished without fair notice and opportunity for input, and that utilities should use existing rights-of-way, avoid prime agricultural land, and ensure landowners are adequately informed before easements, surveys, or infrastructure projects move forward. By mandating early and documented notification, SB 584 ensures farmers can participate meaningfully in proceedings that directly affect their operations, land value, and long-term viability.

Transmission line construction can have serious impacts on agricultural land, including loss of productive acreage, interference with drainage systems, equipment access limitations, and long-term operational constraints. Too often, farmers only learn of these projects after key procedural steps have passed, limiting their ability to protect their property or advocate for alternatives. SB 584 corrects this inequity by guaranteeing that farmers receive timely notice, have a clear pathway to intervene, and can hold applicants accountable for compliance with notice requirements.

For these reasons, the Maryland Farm Bureau respectfully urges a favorable report on SB 584. Thank you for your consideration.

SB 584 - PSC Application Notice - FWA - REALTORS.p

Uploaded by: Lisa May

Position: FWA

SB 584 - Certificates of Public Convenience and Necessity and Transmission Lines - Notice to Landowners

Position: Support with Amendments

Maryland REALTORS® supports the notification requirements set forth in SB 584. Ensuring that property owners and adjacent property owners receive timely, clear notice of proposed transmission line construction is fundamental to protecting private property rights and promoting transparency in the public utility approval process.

While we strongly support robust notice requirements, we have concerns with voiding an application if required notice is not provided and requiring the applicant to begin the entire process anew. Automatically voiding an application may create unnecessary delay, uncertainty, and added costs for all parties—including property owners—without materially advancing the goal of ensuring proper notice.

Restarting the entire process could significantly prolong infrastructure decisions and create inefficiencies, even in cases where a notice defect is technical or inadvertent and can be promptly cured. Therefore, we recommend striking subsection (E) in its entirety and amending (D)(2) to allow the Public Service Commission to pause the review timeline until compliance is demonstrated.

This approach maintains the integrity and enforceability of the notice requirement while avoiding the disproportionate consequence of voiding an otherwise complete application. It ensures that no hearing or approval proceeds without proper notice, while preserving administrative efficiency and procedural fairness.

Property owners deserve meaningful notice and a fair opportunity to be heard before decisions are made. We respectfully urge a favorable report on SB 584 with the proposed amendment.

BILL NUMBER: SENATE BILL 584 - FIRST READER

SHORT TITLE: CERTIFICATES OF PUBLIC CONVENIENCE AND NECESSITY AND TRANSMISSION LINES - NOTICE TO LANDOWNERS

DEPARTMENT'S POSITION: LETTER OF INFORMATION

EXPLANATION OF DEPARTMENT'S POSITION

This legislation creates new requirements for public service companies seeking a certificate of public convenience and necessity (CPCN) for new transmission lines. It mandates that applicants provide written notice by certified mail to all owners of land that would be crossed by the line, as well as to owners of adjacent land.

The bill also states that failure to provide proper notice could invalidate a CPCN. In order to ensure the completeness of certain CPCNs under this new law, the Department expects that this additional requirement would increase costs and review time, as staff would need to help validate the outreach to impacted and adjacent landowners, before the application is sent to the Public Service Commission (PSC).

BACKGROUND INFORMATION

The Power Plant Research Program (PPRP) is responsible for reviewing CPCNs for transmission lines prior to the application being considered by the PSC. Traditionally robust notice requirements are already folded into the CPCN process once it reaches the PSC. Current law and PSC regulations require applicants to provide notice to affected property owners, local governments, and other stakeholders.

This bill would duplicate these public notice requirements and mandate them as part of the initial application process and CPCN review.

BILL EXPLANATION

SB 584 requires a person applying for a certificate of public convenience and necessity for the construction of any transmission line to provide certain notices to certain landowners. Additionally, the bill establishes that failure to provide this required notice would invalidate any related public hearing or, under certain circumstances, void the application for a CPCN entirely.

SB0584 - LOI - Certificates of Public Convenience

Uploaded by: Megan Outten

Position: INFO

Maryland

Energy Administration

TO: Chair Feldman, Vice Chair Kagan, and Members of the Education, Energy, and Environment Committee

FROM: MEA

SUBJECT: SB 584 - Certificates of Public Convenience and Necessity and Transmission Lines - Notice to Landowners

DATE: February 26, 2026

MEA Position: LETTER OF INFORMATION

The Maryland Energy Administration (MEA) respectfully submits this Letter of Information on Senate Bill 584.

Maryland already maintains a structured process for reviewing applications for Certificates of Public Convenience and Necessity (CPCN) for transmission lines. The Public Service Commission (PSC) oversees a comprehensive review that includes formal notice requirements, opportunities for intervention, public comment periods, public hearings in affected jurisdictions, and coordination with State and local agencies. Under current law and PSC regulations, applicants must provide notice to affected property owners, local governments, and other stakeholders.

SB 584 would expand notice requirements by mandating certified mail notice at the time of application to additional categories of landowners and would establish that failure to provide such notice invalidates a public hearing and, in certain circumstances, voids the application entirely.

While meaningful landowner engagement remains an important component of transmission development, the procedural structure established in SB 584 carries operational implications for State agencies that warrant consideration. The bill would require certified mail notice to expanded categories of landowners at the time of application and would mandate automatic invalidation of hearings or voiding of applications if notice requirements are not met.

Although applicants would issue the notices, the PSC would be responsible for verifying compliance, resolving disputes regarding sufficiency of notice, and administering the statutory consequences associated with any deficiency. This would require additional review, documentation tracking, and procedural oversight at the outset of each CPCN filing.

The CPCN process is already resource-intensive. Commission staff coordinate multi-agency environmental and engineering reviews, manage evidentiary proceedings, schedule and conduct public hearings, and maintain complex dockets. Adding mandatory certified mail requirements tied to

automatic nullification provisions would increase administrative monitoring responsibilities and could require staff to revisit filings, rehear matters, or process reapplications.

In practice, even minor issues such as returned certified mail, discrepancies in tax assessment records, or clerical errors could trigger rehearings or void applications. Each of these outcomes would require additional staff time, scheduling resources, and legal review. This workload would fall on State agencies that are already managing a growing volume of transmission, grid modernization, and clean energy infrastructure proceedings.

As Maryland continues to advance reliability and clean energy initiatives, agency capacity remains a key operational consideration. The Committee may wish to evaluate the cumulative bandwidth implications of adding automatic procedural triggers that could necessitate duplicative proceedings and extended review timelines.

MEA offers this information to assist the Committee in understanding the administrative and resource impacts SB 584 may have on State agencies responsible for implementing the CPCN framework.

MEA remains committed to advancing affordability, reliability, and innovation while protecting ratepayers. Our sincere thanks for your consideration of this testimony. For questions or additional information, please contact Megan Outten at megan.outten@maryland.gov or 443.842.1780.
