**Testimony of Bryan Dunning
Senior Policy Analyst
Center for Progressive Reform**

**Before the Maryland House of Delegates' Environment and Transportation Committee:
Requesting a Favorable Report on HB1268: Environmental Permits – Requirements for
Burden Analysis, Issuance and Renewal, and Public Participation (Cumulative Harms for
Environmental Restoration for Improving Shared Health – CHERSH Our Communities
Act)**

Dear Chairman Korman, Vice-Chair Guyton, and the members of the Environment and Transportation Committee,

Thank you for the opportunity to provide testimony on HB1268 (the CHERISH Act) on behalf of the Center for Progressive Reform. The Center is a research and advocacy organization that focuses on advancing good governance and achieving equitable public protections. The CHERISH Act requires that the Maryland Department of the Environment (MDE) assess certain permits for polluting facilities located in disparately impacted communities in Maryland to determine whether they will add to the cumulative health impacts borne by the community. Critically, CHERISH requires that not only MDE conduct this analysis, but resolves a historic issue where the Agency *could* review the cumulative impacts, but could not base a permitting determination on that information. CHERISH empowers MDE to act and provides a pathway forward for Maryland to meet the challenge of its long promise to make good on advancing environmental justice in the state. As such the Center for Progressive Reform requests a **Favorable** report on HB1268.
