

February 6, 2026

I am a 25-year resident of Montgomery County. I am writing to express my strong support (favorable) for HB0345, “Public Utilities - Solar Energy Generating Systems and Solar Renewable Energy Credits.” The legislation should be invaluable for making solar energy more accessible and affordable throughout the state, helping to bring down our greenhouse gas emissions. Please, please take this critical step forward—it will be good for all Marylanders.

Thank you,

Pamela Winston
