House Bill HB 1534

We support passage of bill number HB 1534.

Data Centers should not be allowed to be built on Agriculture Preservation Land. The State of Maryland has paid for this land to remain farm ground. Data Centers should be a benefit to the community. Not the destruction of it.

I understand this is not part of this bill but, Overhead powerlines to supply data centers should not be allowed on Agriculture Preservation land also.

We ask you to Support and Pass House Bill Number HB 1534. Thank you for your effort.

Sincerely,

Kenneth and Fay Miller
