BILL: HB 110

TITLE: Motor Vehicles - School Buses - Seat Belts

DATE: February 5, 2026

POSITION: Favorable

COMMITTEE: House Environment and Transportation Committee &
House Ways and Means Committee

CONTACT: Mary Pat Fannon, Executive Director, PSSAM

The Public School Superintendents' Association of Maryland (PSSAM), on behalf of all twenty-four local school superintendents, **supports** HB 110.

This bill requires every school bus purchased on or after July 1, 2030, and registered in the State to be equipped with, for each seat on the school bus, three-point seat belts that are accessible to passengers. Local school systems must provide student instruction on school bus safety and the proper use of seat belts on school buses, as part of an existing program of safety education. The failure of a school bus operator to ensure that an occupant of a school bus was wearing a seat belt may not be the basis of a criminal prosecution or a civil action for damages against the school bus operator or a school, school district, or municipality. As under current law, "seat belt" is defined as any belt, strap, harness, or like device. The bill also makes various technical changes to terminology.

PSSAM appreciates the intent of House Bill 110 and the sponsors' concern for the safety and well-being of students on school buses. The safe transportation of our students is a top priority for all local superintendents.

While we still believe that school buses are almost 40 times safer than any other form of ground transportation in preventing serious injury or death**, we understand that the installation of seat belts on buses is a matter of when, not if, and, we appreciate the

sponsor's willingness to work with school systems to mitigate the financial and operational impact of changing our bus fleet.

We particularly want to thank the sponsor for taking our concerns seriously regarding student behavior on school buses and potential liability concerns. Although we implement numerous strategies and procedures to lessen the chance of inappropriate action on the part of students, this can be a difficult task.

Therefore, PSSAM **supports** House Bill 110.

**School bus safety requirements are rigid and go well beyond those required for all other passenger vehicles. School buses are constructed with high back padded seats, compartmentalized seating, reinforced chassis, and front and rear bumpers. Compartmentalization provides a protective envelope consisting of strong, closely-spaced seats that have energy-absorbing seat backs. Local school systems adhere strictly to these guidelines. School buses have done an exceptional job of protecting students from serious injury or death in severe head-on and rear-end collisions.
