HB673 – Energy Equality Act of 2026

Delegates [Arikan](#), [Adams](#), [Alston](#), [Anderson](#), [Baker](#), [Beauchamp](#), [Chisholm](#), [Conaway](#), [Fisher](#), [Grammer](#), [Kipke](#), [Miller](#), [M. Morgan](#), [Nawrocki](#), [Reilly](#), [Sample-Hughes](#), [Szeliga](#), [Valentine](#), and [Wivell](#)

FAVORABLE

To date, Maryland has not come anywhere near being able to power the State of Maryland from green energy. Since working to eliminate fossil fuels from providing the majority of our energy, our prices are sky rocketing. Even the Federal Government is striping red tape and restrictions to help us get back to affordable energy costs. The most heard conversation in groups lately has been people comparing their soaring electric bills. I ask you how young families just starting out, seniors, veterans and others on fixed incomes are expected to survive?

So, to limit and dictate appliance and fuel choices will not only hurt the consumers, it will be devastating to our Maryland workforce as jobs involving all the “non-acceptable” appliances and energy sources will disappear. People who never expected to have to ‘tighten their belts’ just to get by are already in shock as savings disappear and panic starts to set in.

We need a variety of energy sources to power a variety of appliances, automobiles and trucks.

I request that you return a FAVORABLE VOTE.
