

on Interstate 97

This morning, one of our deputies was traveling on Interstate 97 when a large sheet of ice slid off another vehicle and struck his windshield, causing it to shatter. Despite the impact, the deputy was able to maintain control of his cruiser and safely drive it to the Millersville shop. He was transported to BWMC and treated for minor injuries.

This incident serves as an important reminder to all motorists: please fully clear snow and ice from your vehicles before driving. Ice becoming airborne can cause serious damage and injuries to others on the roadway. Your extra few minutes can prevent a dangerous situation.
