**Re: Bill: SB 0913/HB1507 – Motor Vehicles Enhanced Tinted Windows – Medical Exemption**

**Support with Amendments**

Dear Chair, Vice Chair and Members of the Committee,

On behalf of the Nurse Practitioner Association of Maryland, Inc. (NPAM) representing over 8,500 NPs licensed in Maryland and 850 active NPAM members, I am writing to state support for **SB 0913/HB1507 – Motor Vehicles Enhanced Tinted Windows – Medical Exemption** with amendments.

We commend the sponsors for their efforts in addressing this important issue and respectfully request that Nurse Practitioners be added to the sections where “Licensed Physician” is stated in the bill.

I refer you to lines 3 through 7, and 23 through 25:

**3 FOR the purpose of authorizing an out-of-state physician or Nurse Practitioner licensed to practice medicine to**

**4 issue a certification for a medical exemption for enhanced tinted motor vehicle**

**5 windows; repealing the time limit applicable to a certification for a medical**

**6 exemption for enhanced tinted motor vehicle windows; and generally relating to**

**7 medical exemptions for enhanced tinted motor vehicle windows.**

**23 2. If the licensed physician or the Nurse Practitioner determines that the owner’s**  
**24 medical condition is permanent, a written certification under this paragraph shall be**  
**valid**

**25 indefinitely.**

Nurse practitioners (NPs) are licensed and nationally certified advanced practice registered nurses, have advanced clinical training and education, and practice independently in Maryland. In both in-patient and outpatient settings, NPs participate in the healthcare team, deliver cost-effective, high-quality healthcare services to patients, and are chosen by many patients to serve as their Primary Care Provider.

NPs, particularly those who specialize in dermatology, often certify patients' need for window tinting to protect them from UV exposure based on risk associated with certain medical conditions. These conditions include but are not limited to: Lupus, Albinism, Xeroderma Pigmentosum, Melanoma, and Solar Urticaria. Patients who see an NP for these and other conditions should not have an undue burden of locating a physician to certify the need for tinted windows, as this may result in a delay in care, duplication of medical services, and wasted healthcare dollars.

For these reasons, we respectfully request you vote favorably to support this bill with the above referenced amendments of adding Nurse Practitioners.

Should you have any questions feel free to contact me at [NPAMexecdir@gmail.com](mailto:NPAMexecdir@gmail.com).

Sincerely,

*Beverly Lang, MScN, RN, ANP-BC, FAANP*

RE: **HB 1507 – Motor Vehicles - Enhanced Tinted Windows - Medical Exemption**

POSITION: **OPPOSE**

The Maryland Chiefs of Police Association (MCPA) and the Maryland Sheriffs' Association (MSA) **OPPOSE** HB 1507. This bill expands the existing medical exemption for enhanced vehicle window tinting by allowing certifications from out-of-state physicians and by removing the current time limits that apply to those certifications. Under current law, individuals may already obtain a medical exemption allowing darker tint when medically necessary, but the certification must come from a physician licensed in Maryland and is subject to periodic review.

MCPA and MSA are concerned that expanding the exemption in this manner will create practical enforcement challenges for officers conducting traffic stops. Window tint laws exist in part to ensure officer safety by allowing officers to see into vehicles during roadside interactions. Allowing certifications from out-of-state physicians and eliminating the time limits for those certifications makes it more difficult for officers to verify the validity of exemptions in real time and increases the potential for misuse of the medical exemption.

Additionally, the current framework already provides a reasonable pathway for individuals with legitimate medical needs to obtain darker window tint while maintaining appropriate oversight through time-limited certifications. Removing these safeguards could undermine the intent of Maryland's window tint laws and complicate enforcement for officers in the field. For these reasons, MCPA and MSA **OPPOSE** HB 1507 and respectfully request an **UNFAVORABLE** report on House Bill 1507.

**POSITION ON PROPOSED LEGISLATION**

**DATE:** March 12, 2026  
**BILL NUMBER:** House Bill 1507      **POSITION:** Letter of Information  
**BILL TITLE:** Motor Vehicles – Enhanced Tinted Windows – Medical Exemption

**REVIEW AND ANALYSIS**

This legislation seeks to alter Maryland’s motor vehicle law governing medical exemptions for enhanced window tinting. It authorizes an out-of-state doctor to provide a letter exempting a vehicle owner from Maryland’s window tint restrictions. The bill further repeals the two-year limitation on a doctor’s authorization.

Under current law, a vehicle owner may obtain a medical exemption allowing darker window tint than otherwise permitted if a Maryland-licensed physician certifies that the individual has a medical condition requiring protection from sunlight. The certification is currently limited in duration, generally not exceeding two years unless the condition is deemed permanent. The tint may not be placed on the front windshield under any circumstances.

House Bill 1507 expands the exemption by authorizing out-of-state licensed physicians to issue medical certifications for use in states where they are not licensed, and repeals the time limitation applicable to the exemption. As a result of this proposed change, any individual could obtain certification from physicians outside Maryland, and the exemption would no longer require periodic review or renewal. This does not account for the fact that many window tint waivers are temporary and granted only for short-term health issues. Ultimately, this bill allows a vehicle owner to permanently operate a vehicle with a window tint darker than Maryland’s statutory requirements.

Expanded exemptions allowing darker window tint may create additional safety concerns for law enforcement. Reduced visibility into vehicles can limit officers’ ability to observe occupants or threats during traffic stops. More vehicles with enhanced tint may heighten risks, especially at night or in low-visibility conditions.

Allowing out-of-state certification complicates verification for officers by introducing varied medical document formats and standards, making compliance harder to verify and increasing the risk of fraud. This also inconveniences drivers, as it may prolong detentions while officers validate out-of-state certifications. The legislation further removes time limits on certifications, ending periodic medical exemption reviews. Although sun protection and other health issues can change over time, the exemption could now remain valid indefinitely. Eliminating renewal reviews removes a key check on ongoing medical necessity.

**POSITION ON PROPOSED LEGISLATION**

House Bill 1507 will require the Maryland State Police to update window tint inspection regulations and provide guidance to inspection stations. These changes would require statewide communication to ensure compliance with the revised law.

The Maryland Department of State Police respectfully urges the Committee to consider this information as you deliberate on House Bill 1507.
