Dear Senators,

I am writing to let you know that my husband, Patrick Dixon and I are vehemently opposed to SB0255. Our democracy was founded on the principle of “one-person, one-vote”.

Federal Voting Act of 1965 already states that all federal law requires that all voters must be treated equally and have an equal voice in all elections. Therefore “protected” classes are already protected and have the same rights as everyone else. This does not need to be changed or suddenly we will have the majority of our population being discriminated against. Every American Citizen should be treated equally no matter what skin color, preferred language or preferred gender is.

This also allows the Attorney General or any person to bring action about a vote which is in a county or municipality. That allows people outside the area in concern to have influence in the outcome of an election.

As Senators it is your job to stand up for the Rights of All American Citizens.

I thank you for doing that.

Sincerely,

Renee S. Dixon
