

I am writing to express support for Maryland Senate Bill 0141.

In an era where misinformation and AI-generated content can spread rapidly, protecting the integrity of our elections is more important than ever. SB0141 provides necessary tools to ensure voters have access to accurate information and are not misled by false or deceptive content, including deepfakes.

SB0141 has the potential to safeguard public trust in our election process as long as while addressing harmful misinformation the legislation still preserves protections for free speech, including satire and parody.

Thank you for your time and consideration to support SB0141.
