

HB 580 "Favorable"

As a Montgomery County resident I support HB580. In fact, I can't imagine any valid reason why the State should prevent the county from choosing the local election method it prefers.

But more than that, I strongly endorse RCV widely, even across the country, because it promotes a closer approximation of true proportional representative democracy, and it promotes a more collaborative, communicative, constructive, and compromising form of political activity, as well as a more fair representation of the views of the people.
