

To Whom It May Concern:

I am writing to condemn Governor Wes Moore's disgraceful power play to extinguish Republican voices in the Great State of Maryland. This is the second attempt by a crooked partisan political elitist group in Maryland within the past seven months to deprive Marylanders of important representation choices.

Unfortunately our Governor and his underlings have forgotten who they represent.

Marylanders! For Governor Moore to stab Maryland Republican constituents metaphorically straight in the back is infuriating to say the least. What a poor representative of our great state to disenfranchise over one million Maryland voters.

Maryland has 1,032,539 registered Republicans, 2,202,830 registered Democrats, 953,440 Registered Independents and 72,417 Registered Other Parties such as the Green Party. Currently, the Republicans hold one seat in the United States House of Representatives. That is one out of the eight seats available. Independents sadly have zero. In calculating Democrat and Republican voters in total and dividing by the representatives allowed, Republicans should solidly have two representatives. In fairness Independents should have one and the Democrats could have five.

Do the right thing Governor and democrat politicians; make sure ALL constituents have representation. It is the most important assignment you have as an elected official in the United States of America! Taking away by purposeful underhanded deceit Republican participation in our state you risk losing not only self-respect but perhaps population as well. Remember in history the largely important crown lost due to "no taxation without representation". You have saddled us with many unwanted taxes and now plan on forcing no representation. Disgusting! And finally, a cheater by definition never wins!
