

SB626, Birth Certificate Modernization Act
House Health Committee, April 1, 2026
Favorable with Amendments

Dear Chair Bagnall and Members of the Finance Committee,

TRAC submits this testimony in support of SB626 with amendments. This bill would streamline procedures for amending sex on birth certificates and introduce a gender-neutral designation option. But the bill received a detrimental amendment that puts Maryland communities at risk by creating a database of transgender individuals who have updated their birth certificate.

TRAC is a Maryland-based and entirely trans-led coalition committed to ensuring that all transgender and gender expansive Marylanders can live safe and affirming lives. Our membership includes healthcare providers, attorneys, academics, organizers and other community members.

We support this bill because having our birth certificate align with our identity, appearance, and life experience is important for our livelihood and wellbeing. Members of our community need their identification documents to match our appearance and identity, especially in 2026 as more individuals will rely on state documentation for safe and accessible travel and daily life needs. The 94,000 trans and nonbinary Marylanders¹ need safe and accurate identity documents to access various identification cards, medical services, and other important opportunities that are basic human rights.

An accurate birth certificate is necessary to prove identity, age, and citizenship status. It is an important document for obtaining a driver's license, social security card, and passport, enrolling in school, opening a bank account, applying for jobs and filling out requisite paperwork, renting and buying homes, driving and renting cars, traveling by airplane, entering secure buildings, applying for government benefits (including Medicaid, food stamps, and social security), joining the military, claiming insurance or pension benefits, and getting a marriage license.

For anyone, these processes are stressful, complex and frustrating. Imagine fearing harassment, rejection, or worse because your birth certificate doesn't align with your identity or presentation. That's a whole lot of living that is obstructed when a bureaucrat, employee, or officer notices a person's gender marker does not match the person's identity or physical appearance and gives them a hard time about it. Indeed, according to the most recent U.S. Trans Survey, 22% of transgender people have been "verbally harassed, assaulted, asked to leave a location, or denied

services when they have shown someone an ID with a name or gender that did not match their presentation.”²

Trans and nonbinary Marylanders deserve to access necessary services with accurate documents and without harassment or denial of entry. We want to show our IDs without fear of retribution. We want to live free. Let Maryland be the champion for LGBTQ+ rights, joining states like California, New York, Pennsylvania, Arkansas, Vermont, and D.C.³ into the only future that matters, one where we are all equal and valued for what we are - human beings.

We ask that you amend SB626 to take out the birth information history amendment. The amendment makes it easier to target trans individuals in Maryland by creating records of who has changed their birth certificate. In an era where anti-trans actors are suing and harassing trans individuals, and the federal government is issuing subpoenas on transgender individuals and their supporters, the state should not mandate the creation of records that would ‘out’ individuals as transgender.

We respectfully urge this committee to return a favorable with amendments report on SB626.

Sincerely,

The Trans Rights Advocacy Coalition
