

Nia Chamberlain

Clinton, Maryland

In Support of **House Bill 1527**

Maryland House of Delegates

Written Testimony

Good afternoon. My name is Nia Chamberlain, and I am here in support of Maryland House Bill 1527.

I support this bill because I believe people should have the right to choose the types of health and wellness services they use. Many people already seek alternative or complementary options, and this bill simply ensures that those choices happen with honesty and transparency.

What is important about this bill is that it protects consumers while still respecting personal choice. It requires practitioners to clearly explain who they are and what services they provide so that people can make informed decisions.

It also keeps clear safety boundaries in place and does not change existing medical licensing laws. Instead, it helps ensure that everyone understands the difference between medical care and wellness services.

At the end of the day, people deserve the freedom to explore different approaches to their health as long as they have clear information.

For these reasons, I respectfully ask the committee to support House Bill 1527.

Thank you for your time.
