

MD HB 1380

Dear Honorable Committee Members,

I oppose HB 1380 due to concerns about insurance covering these powerful and harmful drugs that have not been proven to be helpful for gender confused individuals. Long term clinical trials are very important before anything of this nature should be available, much less covered by insurance.

I am also afraid that the perhaps unintended consequences of this bill, should it pass, will allow for an individual to stock up with a 12 month supply.

I appreciate the chance to be heard as the parent of an autistic and very vulnerable youth caught up in this insanity.

Cathy Groen
