

To whom it may concern:

I have attached the correspondence from OHCQ to me. OHCQ says the Director of Nurses and patient's physician report no evidence of physical abuse. This is patently false. When I discharged weeks later, Brian's face was black and blue. Anyone who says relevant witnesses were interviewed is not being truthful. As one of the few competent patients in that facility, I would think I was a pretty relevant witness. I was not interviewed.

So sworn.
