

Bill #HB1527, FAVORABLE

Elizabeth Ann Clark 410-245-4140

1706 Crossbay Ct, Severn, MD 21144

I am 70 years old, and my life has been devoted to health and healing. I have worked at Johns Hopkins at a senior level and taught Diagnostic Ultrasound there and at BWMC.

As I aged, I became chronically fatigued with back pain and insomnia. I developed Type II Diabetes and severe Neuropathy in my feet. It was like 1000 hornets stinging my feet. It got so bad I couldn't wear shoes. A painful rash began breaking out all over my body. I was given repeated rounds of oral and topical steroids, which sent my blood sugar through the roof, and of course I gained 50lbs. Then I began to have chronic migraines and blurred vision. I had recurring bouts of indigestion and reflux. I was in a living hell. I did not want any more prescription drugs, nothing was working. I was 65 and was living as a semi-invalid. I could barely take care of my house and husband. All I wanted to do was sleep.

I prayed to God, that I would find some help. I met an alternative healthcare provider. They offered things I'd never heard of in the medical world: Bioenergetic Rebalancing- using my own reflexes to find the root causes of my problems and remove the blocks to my body healing itself through nutritional supplements; NASA's Zero Gravity Red Light Bed to reduce inflammation and re-energize my cells; the regrounding of my electrical system with a Pulsed Electromagnetic Frequency matt; and Ion Cleanses in a foot bath to help detox.

My bodies response was astounding. After 3 weekly sessions, the rash was gone, the migraines and stinging in my feet was almost gone and I could wear shoes again! NASA's Red-Light bed turned on my energy and took down the inflammation. Over the next year it also helped me lose 40lbs and a size and a half. I was also counseled on eliminating inflammatory foods so I could continue to recover and maintain my health.

Now, 5 years later, I am 70 years old, and back in the work force. I have studied to become an alternative healthcare practitioner. I hope you will support this new bill and my new life career!
