

I would like to express my deep concern regarding this midcycle redistricting. If HB0488 passes it will effectively remove the voice of the people in the district where I live. Despite the many comments against this gerrymandering during the commission process, Gov. Moore went ahead with it. No testimony was heard regarding the impact this decision could have. No meetings held in person. No opportunity to object. This is unconstitutional. And to have the vote during a major snow event with ice, ensuring many will not be able to testify due to a lack of electricity, is despicable. Governor Moore, your priorities and intentions have been revealed. If your plans for our state were good and honorable you would not use these tactics to accomplish them. You say this is the will of the people, that is clearly not the case.
