

I oppose HB 0488 redistricting. The proposed lines are deviously partisan favoring democrats. With only five months until the primary, this is a heinous overreach of power from Wes Moore.

Republicans and independents are already underrepresented in congress due to past gerrymandering and there has been no recent census to justify new congressional districts.

Redistricting that returns the lines to circa 2008 with contiguous boundary lines rather than gerrymandered to favor blue areas would be fair and balanced, however HB 488 seeks to use power to redraw district further suppressing republican and independent voters.

I don't believe the new proposal takes into any account the masses of constituents that have moved out of Maryland. The goal should be fair and balanced representation and HB 488 Election Districts - General Assembly and Representatives in Congress and this bill is purely an abuse of partisan majoritarianism by democrats.
