SB0752 Commission to Review and Assess Racial Disparities in the State Criminal Justice System

UNFAVORABLE

One of the last things the State of Maryland needs is another commission to study something and waste more taxpayer money and resources. What we need is for our legislators to concentrate on protecting our law bidding citizens by immediately applying punishment for crimes committed. We are letting criminals go free so they can rob, steal, rape and murder a second, third or 20th time.

Criminals are coddled instead of punished so the youth especially, see no harm in doing it again. Please, no more commissions. Put your time into creating a safe society by putting criminals in jail.

There must be consequences for crimes, not studies to see if they are comfortable in jail or abused by a sense that everything is racially driven.

I request that you return an UNFAVORABLE VOTE
