

House Bill 0577
Criminal Law - Firearm Crimes - Machine Gun Convertible Pistols
UNFAVORABLE

Existing law already bans any “rapid fire activator” type device, including a removable manual or power-driven activating device, constructed so that, when installed in or attached to a firearm, the rate at which the trigger is activated increases, or the rate of fire increases. “Rapid fire activators” include a bump stock, trigger crank, hellfire trigger, binary trigger system, burst trigger system, switch/auto-sear, or a copy or a similar device, regardless of the producer or manufacturer.

The so-called “Pistol Converter” AKA “Glock switch” is already banned under Federal law and existing Maryland Criminal Law§4-301 (m) and (n).

A person who violates this subtitle is guilty of a misdemeanor and on conviction is subject to imprisonment not exceeding 3 years or a fine not exceeding \$5,000 or both.

A person who uses a “rapid fire activator,” in the commission of a felony or a crime of violence as defined in § 5–101 of the Public Safety Article is guilty of a misdemeanor and on conviction, in addition to any other sentence imposed for the felony or crime of violence, shall for a first violation be sentenced to imprisonment for not less than 5 years and not exceeding 20 years. For each subsequent violation, the person shall be sentenced to imprisonment for not less than 10 years and not exceeding 20 years.

Should House Bill 577 become law, most Glock models (e.g., 17, 19, 21, 22, 23, 31, 32) which utilize a cruciform trigger bar design as well as Glock-style clones such as the Ruger RXM which utilize a similar cruciform bar concept will be rendered valueless to their lawful owners. Criminals will not be impacted by the new law because they do not acquire firearms through the legal market. Senate Bill 334 will raise the black-market value of Glock style pistols and 3D printed pistols which are already illegal in Maryland.

Glock switches are not manufactured by, or available from, Glock. The "Glock switch," a device that converts semi-automatic Glock pistols into fully automatic machine guns, was invented by Venezuelan Jorge A. Leon.

Leon created the auto-sear device around 1987, with a patent filed in 1996 and approved in 1998. He has since expressed regret for the invention due to its use in violent crime.

Original Intent: Intended for military and police use in Venezuela.

Patent: Filed in 1996 and approved in 1998.

Status: The original patent expired in 2016, but the device is illegal in the U.S. under the National Firearms Act.

A proponent of this legislation cited 65 handguns seized in Baltimore City during 2024 as justification for banning all pistols utilizing the cruciform trigger bar. What this proponent neglected to do was provide some perspective on the number of "Glock Switch" equipped pistols with the overall number of firearms seized in Baltimore City during 2024. According to the Baltimore City Police Department's annual report (see Public Safety §3-501.1), the actual number was 81, or 3% of over 2,500 firearms seized in 2024. Twelve of the 81 guns were 3D printed guns without serial numbers, which are already prohibited by existing laws.

Additionally, of the confiscated handguns, 324 had no serial number, 233 were Polymer 80 frames, and 41 were of unknown manufacture, which is typical of already illegal black-market firearms.

This proposed ban on a legal product, currently owned by tens of thousands of law-abiding citizens, simply because it may be used by criminals, presents some interesting parallels.

For example:

- Even though voting machine errors are uncommon considering the number of voting machines, we should consider banning voting machines.
- Most citizens who wear hoodies are law-abiding, are we to ban these popular garments simply because so many crimes are committed by criminals who often use these hooded garments to conceal their identity.
- Speeding vehicles and impaired drivers are a nationwide problem. Should we require speed limiting devices and DUI limiting devices on all vehicles for all Maryland citizens because some break the law?

While the foregoing scenarios are for illustrative purposes only, they do demonstrate the peculiar attraction of legislation which mistakenly shifts the focus of our laws to inanimate objects rather than the actions of those who violate the law.

It is worth noting that there are currently exemptions for:

- Certain law enforcement agencies, including United States Immigration and Customs Enforcement (ICE)
- Transfer to law enforcement officers upon retirement
- Employees of armored car companies

Curiously, §4-302 permits the transfer of a machine gun convertible pistol to a licensed dealer in another state or to a licensed dealer for transfer to an individual in another state. It appears the sponsors of HB 577 have more faith and trust in persons who live in other states than they do in persons residing in Maryland.

Glock pistols and those of similar design are among the most common handguns in Maryland. Persecuting the law-abiding in response to the actions of criminals is anathema to the Legislature's obligation to ensure equal justice under the law.

When the Maryland General Assembly passes legislation which limits the civil and Constitutional Rights of citizens due to the actions of the criminals, it blurs the line as to which constituency it is truly serving.

Human ingenuity gives us the ability to adapt machines to perform functions not envisioned by the original designers. Firearms are simply machines. Many firearms can be modified to allow fully automatic fire using only a simple flat file. GIs in World War 2 did such modifications to convert the classic M1 Garand rifle from semi-automatic to fully automatic.

A very common .22 caliber semi-automatic rifle (estimated 11 million in existence) can be modified to fully automatic fire with the same flat file.

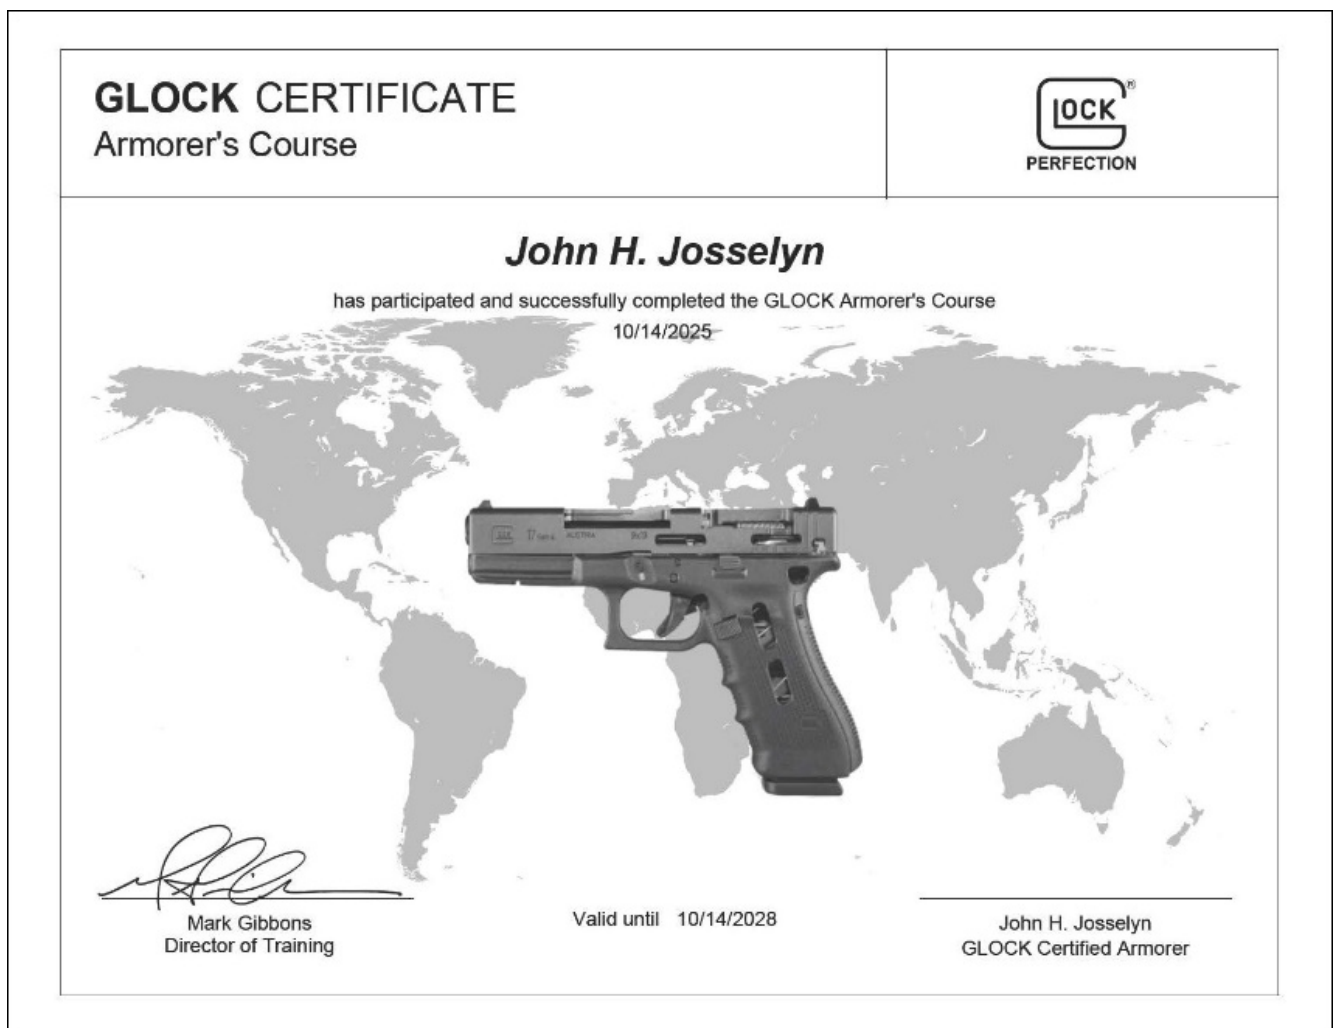

Such conversions are rare simply because law-abiding citizens, unlike criminals, respect the rule of law. Does HB 577 signal the advent of a legislative witch hunt which will extend to every semi-automatic rifle, pistol and shotgun?

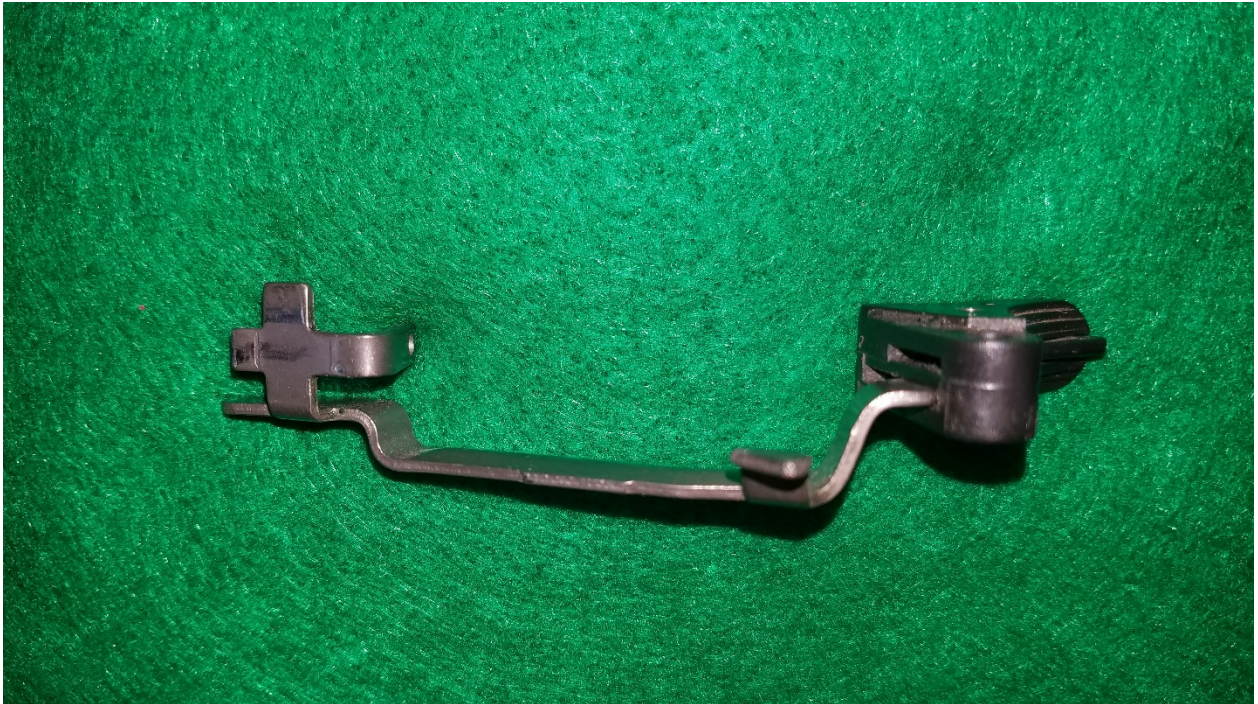

House Bill 577
Unfavorable

We strongly urge the Committee to trust Maryland's law-abiding citizens and return an unfavorable report on House Bill 577.

John H. Josselyn
2A Maryland
02/11/2026

Firearm Destruction Date: 10/3/2024

Destruction location: Arcelor Mittal 139 Modena Rd, Coatesville, PA 19320

All firearms destroyed by Evidence Management Unit and witnessed by BPD Inspections Unit personnel.

***Source of firearm not captured for firearms before 2023**

***Firearms Type not captured for items before 2021**

All firearms are destroyed for one of three reasons:

1. Owner cannot be identified
2. Identified owner is not eligible to be in possession of a firearm
3. Firearm turned in by citizen for destruction.
