Aruna Miller
Lt. Governor

TO: Chair Bartlett, Vice Chair Davis, and the Members of the Judiciary Committee
FROM: Governor's Office of the Deaf and Hard of Hearing
SUBJECT: Testimony on HB310/SB268 (Correctional Services – Restrictive Housing –
Individuals With Developmental or Intellectual Disabilities)
Position: Favorable
HEARING DATE: March 3, 2026

Dear Chair Bartlett, Vice Chair Davis, and the Members of the Judiciary Committee,

On behalf of the Governor's Office of the Deaf and Hard of Hearing (ODHH), I write to express strong support for House Bill 310 and to support the Department of Public Safety and Correctional Services' efforts to enhance assessment and placement practices for incarcerated individuals with developmental or intellectual disabilities.

Individuals who are Deaf, Hard of Hearing, DeafBlind, or who have hearing loss are disproportionately impacted within correctional settings, particularly when disabilities are unidentified or inadequately assessed. House Bill 310 represents an important step toward ensuring that incarcerated individuals with cognitive, developmental, or intellectual disabilities are appropriately identified and protected from placements that may exacerbate existing conditions or create additional barriers to communication, comprehension, and access to services.

The Governor's Office of the Deaf and Hard of Hearing recognizes and appreciates the Department of Public Safety and Correctional Services' current intake, medical, and mental health screening processes, including ongoing clinical evaluations, referrals, and access to care. House Bill 310 complements these existing practices by strengthening the focus on

developmental and intellectual disability assessments and by allowing clinical professionals to make informed recommendations regarding restrictive housing placements.

Restrictive housing can present significant challenges for individuals with communication disabilities or cognitive impairments, increasing the risk of isolation, misunderstanding, and adverse mental health outcomes. Ensuring that placement decisions are informed by appropriate clinical assessments aligns with best practices, promotes safety, and supports a more rehabilitative correctional environment.

For these reasons, the Governor's Office of the Deaf and Hard of Hearing supports House Bill 310 and respectfully urges the Committee to issue a favorable report.

Thank you for your consideration and continued commitment to equitable and humane treatment for all incarcerated individuals.

Director Usherla DeBerry, Ed.S.

Governor's Office of the Deaf and Hard of Hearing
