I am writing to strongly support passage of HB630 to prevent any conversion of Warehouse space or otherwise constructed buildings or facilities to be used for any purpose other than for what purpose it was constructed. In particular, I strongly support preventing any conversion of space to be used by Homeland Security to develop detention centers or in any way house humans for any detention or constraint. I.C.E. has demonstrated extreme and illegal measures taken in actions against immigrants, citizens and children. The policies are against both the laws and principles of our democracy and Constitution and all measures must be taken to prevent and reverse illegal and abusive I.C.E. arrests, detentions and deportations. Passage of HB630 will hopefully prevent construction of or use of converted property to detain humans and help stop enabling such illegal and undemocratic practices in Maryland.

Thank you to those legislators who created and developed HB630. Your support for our Constitution, and your constituents, is seen and appreciated.

Sincerely,
Dale Stein
