To Whom It May Concern:

I support cameras in special needs classrooms. I support special needs children having a voice and feeling safe within their school. I support teachers and school personnel having the ability to review and grow from the opportunities created by having cameras in special needs classrooms.

I speak from experience as a school based clinical supervisor, IEP team member, and family member of a child with special needs when I share my vote for protecting all individuals in a classroom from malicious wrong doing through the use of cameras.

Sincerely,

Autumn Brennan, LCPC
