
TO: House Ways and Means Committee

BILL: House Bill (HB) 311- Individuals with Disabilities - Accessibility and Emergency Planning

DATE: February 11, 2026

POSITION: Support

The Maryland State Board of Education (State Board) and the Maryland State Department of Education (MSDE) support HB 0311, which would further reinforce the existing obligations of local boards of education by requiring them to include issues associated with accessibility for individuals with disabilities when developing solutions for physical safety concerns.

HB 0311 requires local boards to report instances in which a public school facility became inaccessible for a student with a disability in a manner that could impede evacuation or an emergency response. The legislation also adds a clause to ensure the confidentiality of these LEA annual reports submitted to the Maryland Center for School Safety (MCSS), requiring them to be exempt from Maryland Public Information Act requests, except for disclosure to members of the General Assembly, if requested. It should be clarified whether the State Board of Education would also have access to these reports to utilize in the work of the Agency. The additional data gathered through HB 0311 would be invaluable to help understand the extent of accessibility issues impacting safety for all individuals in public school facilities and begin to formulate solutions.

HB 0311 builds upon the framework established in the Code of Maryland Regulations (COMAR) 13A.02.02.05 - Annual Certification, which requires that by September 30 of each year, each local superintendent of schools and the Head of the SEED School certify whether LEA emergency plans are aligned with the MSDE emergency planning guidelines. The Emergency plan certification is collected by MSDE each year and plans are analyzed by MCSS upon submission. Additionally, as outlined in Maryland Code, Education Article § 7-1501, LEAs are required to submit their emergency operations plans (EOPs) to the MCSS by August 1 of each year. The EOPs are required to provide detailed plans for how each public school will accommodate students with disabilities during emergencies.

MSDE remains committed to the accessibility and safety of all Maryland public schools for students, staff, and the community, and will work in collaboration with the MCSS to ensure compliance with state and federal laws and regulations. We respectfully request that you consider this information as you deliberate HB 0311.
