Dear Delegates,

I am writing you so you know many retirees, like myself, are on a fixed income that have qualified for the Home Owners Tax Credit for years who have seen the credit get smaller and smaller because of the house prices going up from inflation but the Social Security doesn't keep up with the inflation making it harder and harder to pay the house taxes every year, usually having to cut back on some thing or even sell something so the house doesn't go into tax sale and it does whether its 1 dollar or a 100 dollars you owe them it will go to tax sale.

Please pass or vote to pass for adjusting the Home Owner Tax Credit to make up for all the inflation we got. It's the same house, no better than 10 or 20 years ago. Matter of fact it even needs a new roof put on it that I might be able to get with the money I can save with you fixing the tax credit.

Again, please vote to pass the bill HB1308. Thank you!
