

Delegates,

My name is Crystal Kijesky.

I am a resident of Charles County.

I am in favor of proposed bill HB0063 and ask that you give it a favorable report.

Girls and boys are physically and physiologically different.

From the moment of their conception, their DNA is inherently who they are, scientifically speaking.

All cells have their inherited sex genes and this does play a major role in all aspects of their development.

Girls and boys need separate spaces and activities as level playing fields.

Give this bill, HB 0063 a favorable report.

Respectfully,
Crystal Kijesky
LaPlata, MD
