## Grant and Loan Capital Improvement Program (\$ in Millions)

GO: general obligation

# Key Observations

- Further delays in funding for the Clifton T. Perkins (Perkins) North Wing Renovation.
- The department is still finalizing the facilities master plan, which was previously expected in April 2020. The *Capital Improvement Program* (CIP) programs funding for both the decommissioning and demolition of vacant building and a placeholder for the construction of new facilities to be identified by the master plan.

# Summary of Recommended Bond Actions

1. Community Health Facilities Grant Program

Approve \$6,500,000 in general obligation bonds.

2. Federally Qualified Health Centers Grant Program

Approve \$2,500,000 in general obligation bonds.

3. Clifton T. Perkins Hospital North Wing Renovation

Approve \$106,000 in general obligation bonds.

4. SECTION 2 – Maryland Department of Health – Clifton T. Perkins Hospital

Approve amendment to the prior authorization.

5. SECTION – 2 – Maryland Department of Health – Clifton T. Perkins Hospital II

Approve amendment to the prior authorization.

# Summary of Issues

The department's facility master plan is still outstanding, while funding in the out-years represents projects directed from the plan's findings.

The renovation of the Perkins North Wing is continuing to experience delays, with project expenditures now extending into fiscal 2025.

## **Budget** Overview

## **Changes to Funding Limits for the Maryland Department of Health Grant Programs**

Chapter 386 of 2019 went into effect on October 1, 2019, and impacts both the Community Health Facilities Grant Program (CHFGP) and the Federally Qualified Health Centers (FQHC) grant program. This legislation increases the State funding limits for both programs from 75% to 90%. Fiscal 2022 is the first year that this increased funding limit has been implemented by the Maryland Department of Health (MDH). This increased funding levels applied to both the FQHC grant program and the CHFGP. Even with this increased funding levels being implemented, only one FCHQ project and two CHFGP projects ultimately use 90% State funds. However, the CHFGP does have one other project that exceeds the former funding threshold.

## **Community Health Facilities Grant Program**

The fiscal 2022 capital budget provides \$6.5 million for the CHFGP, which is consistent with what was programmed for fiscal 2022 in the 2020 CIP. The CHFGP is funded at \$6.5 million annually through fiscal 2026, which is also consistent with programmed funding levels in the 2020 CIP.

MDH has selected 10 projects for capital grant funding between 8 jurisdictions, outlined in **Exhibit 1**. Eight of the projects were recommended by the Behavioral Health Administration, and the remaining two were recommended by the Developmental Disabilities Administration.

Although the total value of the fiscal 2022 grant is slightly over \$7 million, the department intends to use \$581,000 of available unencumbered funds that reduces the amount needed to the \$6.5 million proposed. This cash flow adjustment allows the department to make grant awards in excess of available funds and accounts for the time that it takes for grant recipients to begin to draw down grant awards.

Much like previous grant cycles of the CHFGP, many of the projects focus on expanding housing opportunities, adding units or beds for individuals with either behavioral health or

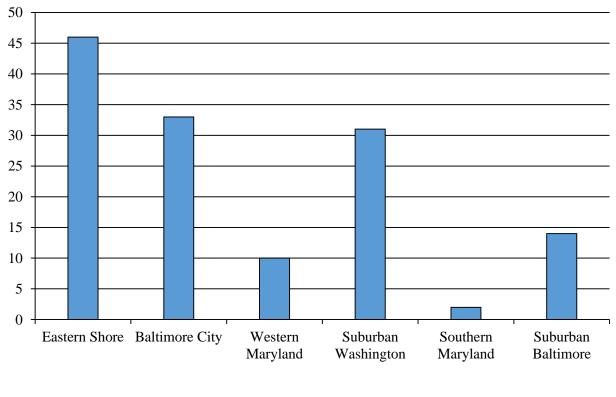

developmental disabilities diagnoses. **Exhibit 2** below highlights the projects adding treatment capacity to the State.

## Exhibit 2 Additional Beds and Housing Units through CHFGP Fiscal 2022

## **Federally Qualified Health Centers Grant Program**

There are 21 FQHC organizations in Maryland with 136 delivery sites statewide, including 1 urban Native American clinic in Baltimore City. To qualify for designation as an FQHC, an area must first be designated by the federal government as a medically underserved area or serve a medically underserved population based on criteria established by the U.S. Department of Health and Human Services. Baltimore City contains 33 of the 136 FCHQ service sites in Maryland. The distribution of FQHC service sites by region and the number per 100,000 residents is shown in **Exhibit 3**, below. The only counties without a single FQHC service site are Calvert and Carroll.

■ FQHC Service Sites

FQHC: Federally Qualified Health Centers

Source: U.S. Department of Health and Human Services

As shown in **Exhibit 4**, the fiscal 2022 request for the FQHC grant program has four projects selected in four jurisdictions. The Maryland Consolidated Capital Bond Loan of 2021 includes \$2.5 million in general obligation bonds for this program.

Source: Fiscal 2022 Capital Improvement Program

The funding for the fiscal 2021 FQHC grant program includes \$63,000 of additional funding available due to anticipated carryover available from prior year commitments. This carryover allows the fiscal 2022 projects to total \$2,563,000.

## Issues

## 1. Further Delays in the Perkins North Wing Renovation

Perkins is the State's only maximum-security forensic facility. Currently, the 80-bed north wing of Perkins is comprised of four 20-bed medium/minimum-security units. The proposed renovations will transition this unit into additional maximum-security units, reducing the bed capacity from 80 to 68 beds. The renovations will also create a new admissions unit with a secured sally port for the maximum-security population. The renovation will also address infrastructure deficiencies such as updating the kitchen and security system in the unit. As shown in **Exhibit 5**, this project has been delayed from what was anticipated at this time last year. This is the second such delay as last session's CIP reflected a similar one-year deferral resulting from delays in finalizing the project scope and awarding a design contract. Other than a small design authorization, the schedule now reflects construction funding to take place over three fiscal years, beginning in fiscal 2023.

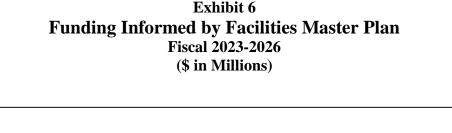

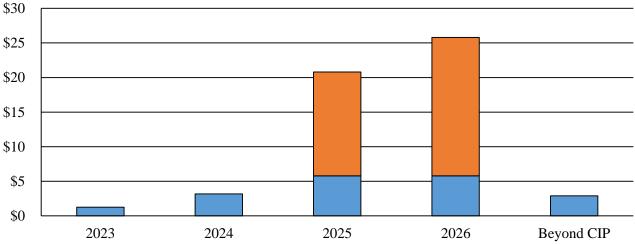

Although the project is experiencing delays, total costs are anticipated to decrease by \$2.3 million. Previously, the department anticipated presenting the Board of Public Works (BPW) with an Architectural and Engineering solicitation contract early in calendar 2021, however, at the time of this writing, that has yet to appear before BPW. **MDH should comment on the status of the design** 

contract to be submitted to BPW and other factors contributing to the delays of the North Wing renovation project.

## 2. Facility Master Plan Delay Due to COVID-19

Originally requested in the 2018 *Joint Chairmen's Report* (JCR) and due on October 1, 2018, after two extensions granted by the budget committees, the master plan was anticipated to be submitted by April 15, 2020. The department cited the growing scope of the project and comprehensive nature of this undertaking for the cause of these initial extensions. The submission of the plan was further delayed to October 2020, given staff resources dedicated to COVID-19 response. At present, the report has yet to be submitted. As previously discussed, the CIP contains funding in the out-years to address projects identified, beginning in fiscal 2023. The current plan for these capital funding needs is shown in **Exhibit 6**.

Demolish Various Decommissioned Buildings at MDH Facilities Future Master Plan Projects

CIP: *Capital Improvement Program* MDH: Maryland Department of Health

Source: Capital Improvement Program

It is worth highlighting that the out-year funding for projects informed by the facilities master plan are not specific projects currently outlined in the CIP. Rather, funding is currently reflected as a

placeholder for projects when those are ultimately determined. Because of this preliminary nature of the funding requests in the CIP, the Department of Legislative Services (DLS) would anticipate the amounts fluctuating as projects are selected. Further, the 2020 JCR requested specific information on the future of unused buildings and space at the Springfield Hospital Center. This report was granted an extension by DLS to January 1, 2021, with MDH citing alignment with the facilities master plan, as well as staff resources focused on COVID-19 capacity as cause for the delays. At the time of this analysis, this report has also yet to be submitted. **MDH should comment on the status of the Springfield Hospital Center report as well as the facilities master plan. MDH should further comment when these reports will be submitted to the General Assembly.** 

# **GO Bond Recommended Actions**

- 1. Approve \$6,500,000 in general obligation bonds for the Community Health Facilities Grant Program.
- 2. Approve \$2,500,000 in general obligation bonds for the Federally Qualified Health Centers Grant Program.
- 3. Approve \$106,000 in general obligation bonds for Clifton T. Perkins Hospital Center.
- 4. Approve amendment to the prior authorization for Clifton T. Perkins Hospital Center.
- 5. Approve amendment to the prior authorization for Clifton T. Perkins Hospital Center.

# **Program Description**

*CHFGP:* Provides capital grants for the acquisition, design, construction, renovation, and equipping capital expenses of facilities that provide mental health, developmental disabilities, and substance use treatment services. This program plays a key role in the deinstitutionalization of individuals with behavioral health diagnoses and builds residential capacity within the community.

**FQHC Grant Program:** Provides grants to private nonprofit organizations that have been designated by the federal government as FQHCs. FQHCs provide services to all persons regardless of their ability to pay, including primary, preventive, and specialty health care services in medically underserved areas throughout the State. MDH's grant program provides funding for the acquisition, design, construction, renovation, and equipping of FQHC facilities. The FQHC grant enhances access to care by developing health care facilities that are operating in medically underserved areas.
